Introduction

Basis for the Issuer's obligation to disclose the information in the form of quarterly report:

The Issuer has the securities Prospectus registered in respect of securities of the issuer;

State registration of issue (additional issue) was followed by registration of securities prospectus, along with it such securities were offered by public subscription or by private offering to persons which amount did not exceed 500.

The Issuer is a joint-stock company founded during privatization of state and/or municipally owned enterprises (subdivisions) under the privatization plan approved in accordance with the established procedure, representing Issuer's shares issuance prospectus as of its approval date and envisaging the possibility of the Issuer's shares alienation by more than 500 purchasers or by general public.

Exchange-traded bonds of the issuer are admitted to trading on an organized exchange with the submission of bonds prospectus to stock exchange.

In the report the Public Joint-Stock Company of Power Industry and Electrification of Kuban is also referred to "Kubanenergo" PJSC, the Issuer and the Company, when referring to the events happened before 22.06.2015 (the date of changing the Company's name) – "Kubanenergo" JSC. "Rosseti" PJSC ("IDGC Holding" JSC until 04.04.2013, from 04.04.2013 until 17.07.2015 – "Rosseti" JSC) and the names of other legal entities are used here the way they were at the referring period (event).

The report contains additional information requirements for which disclosure are set by the restated Regulations on the Information Policy of the Company approved by the Board of Directors of "Kubanenergo" JSC on 15.08.2013, Minutes No. 170/20013 dated 16.08.2013. The full text of the Regulations on the Information Policy is available on the corporate website "Kubanenergo" PJSC and website of information agency "Interfax":
http://www.kubanenergo.ru/about/internal_documents/,
<http://www.e-disclosure.ru/portal/company.aspx?id=2827>.

The Issuer's activity is referred to the sphere of natural monopoly being controlled by the state, tariffs for services of electric energy transmission through distribution networks as well as the amount of payment for technological connection to electric power grids are established by the state body for tariff regulation – Regional Energy Commission - Price and Tariff Department for the Krasnodar Region.

Abbreviated DZO (SDC) means subsidiary and dependent companies in accordance with article 6 of the Federal law "On joint stock companies".

Information on the positions held by members of the management and control bodies of the issuer are specified in paragraphs 5.2.1 and 5.2.3 of this report in accordance with the data provided by the members. When disclosing information on the positions held by these persons are specified as of the date of the reporting quarter.

The present quarterly report contains estimates and forecasts by the Issuer's authorized management bodies regarding the future events and/or actions, prospects for development of the economy branch wherein the Issuer carries out one's core activity and results of the Issuer's actions inclusive of the Issuer's plans, probability of occurring particular events and implementation of particular activities. Investors should not completely rely on the estimates and forecasts presented by the Management Bodies of the Issuer since actual results of the Issuer's activity in the future may vary from those forecast due to multiple reasons. Acquisition of the Issuer's securities is associated with risks described in the quarterly report.

E-mail: **mail@rsmrus.ru**

Auditor's membership in self-regulating auditor organizations:

Name: **Self-regulatory organization of auditors Non-profit Partnership “Auditing Association “Sodruzhestvo”**

Address: **21/4 Michurinsky Prospekt, Moscow, Russia 11919**

Additional Information:

The primary registration number of “RSM RUS” LLC in Self-regulatory organization of auditors Non-profit Partnership “Auditing Association “Sodruzhestvo” is 11306030308.

Financial year(s) from among the last five financial years and the current year for which the Auditor carried out (will carry out) an independent audit of accounting (financial) statements of the Issuer

financial (accounting) statements, year	Consolidated financial report, year
2015	2015
2016	2016

Periods among the five financial last years and the current year for which the Auditor carried out (will carry out) an independent audit of accounting (financial) interim statements of the Issuer

financial (accounting) statements, year	Consolidated financial report, year
9 months of 2015	-
9 months of 2016	-

Factors that may affect the independence of the auditor (auditing organization) of the issuer, including specified information on any material interests between the auditor (or persons holding positions in the management bodies and the bodies of control over financial and economic activities of the audit organization) and the issuer (persons holding positions in the management and control bodies of financial and economic activities of the issuer):

There are no factors that may affect the independence of the auditor (auditing organization) of the issuer, including specified information on any material interests

between the auditor (or persons holding positions in the management bodies and the bodies of control over financial and economic activities of the audit organization) and the issuer (persons holding positions in the management and control bodies of financial and economic activities of the issuer)

Procedure for selection of the Issuer's Auditor:

Presence of a tendering procedure for selection of Auditor and its basic conditions:

Tender procedure for selecting an auditor (audit organization) was not carried out.

The candidacy of the auditor was determined via competitive procedures. For participation in competitive procedures, an auditor (organization) should meet the following criteria:

- shall not be in the process of liquidation;
- shall not have the resolution concerning the suspension of operations in accordance with the procedure stipulated by the Code of the Russian Federation on Administrative Offences as of the date of consideration of the Application Form for participation in the Competition;
- shall not have debts on the accrued taxes, duties and other obligatory payments to the budgets of any level or the state unappropriated funds as of the last calendar year the amount of which exceeds twenty five percent of the balance sheet asset of the participant according to the accounting reports as of the last completed accounting period;
- shall not fall under terms enlisted in clause 1 of article 8 of the Federal Law "On the Auditor's Activity" No.307 dated 30 December 2008.

On the basis of decision of the Tender committee of Rosseti on summing up the results of public competitive negotiations without prequalification of bidders for the right to conclude contracts on obligatory annual audit of reports of affiliated and depended companies of Rosseti for 2015-2017 (minutes of meeting No.5/552p dated 20.04.2015), the candidature of "RSM RUS", LLC was pronounced the winner.

Procedure for nominating auditor for approval at the Meeting of Shareholders (Participants), including indication of the management body making the decision:

According to the Federal Law "On Joint-Stock Companies", the Auditor of the Company is subject to approval by the General Meeting of Shareholders. However, the legislation fails to set forth the auditor candidacy nomination procedure: unspecified are the terms and the procedure of the auditor candidacy nomination for inclusion in the list for voting on the issue of approval of Auditor of the Company. In this regard, the candidature of an auditor for approval by the general meeting of shareholders shall be preliminary considered by the Audit Committee of the Board of Directors of the Company and, with the advice of the Audit Committee shall be determined by the Board of Directors of the Company in dealing with the issue of preparation and holding of the Annual General Meeting of Shareholders.

The auditor did not perform works within the framework of special audit assignments.

Procedure for determining the remuneration of the auditor; actual amount of remuneration paid to the auditor by the results of the last completed financial year on which the auditor performed audit of accounting report; information on deferred and overdue payments for the services rendered by the auditor:

The amount of payment for services of the Issuer's Auditor approved by the General Meeting of Shareholders of the Issuer for compulsory annual review and validation of the Issuer's annual financial statements is determined by decision of the Board of Directors.

The amount of payment to "RSM RUS" Ltd. for services on audit of accounting (financial) statements of the Issuer for 2015 prepared in accordance with Russian Accounting Standards and audited consolidated financial statements for 2015 prepared in accordance with International Financial Reporting Standards amounted to 1 614 104 rubles 40 kopecks, including VAT. The size of payment for services of "RSM RUS" Ltd. on the audit of

accounting (financial) statements of the issuer for 2016 prepared in accordance with Russian Accounting Standards and audited consolidated financial statements for 2016 prepared in accordance with International Financial Reporting Standards will be 1 614 104 rubles 40 kopecks, including VAT.

There are no deferred or overdue payments for services provided by Auditor.

Factors that may affect the independence of the auditor from the issuer as well as interests binding auditor (officials of the auditing company) with the issuer (officials of the issuer): no.

1.3. Details of Appraiser(s) of the Issuer

Appraisers were not engaged during 12 months up to the date of end reporting quarter.

1.4. Details of consultants of the Issuer

Consultants were not engaged during 12 months up to the date of end reporting quarter.

1.5 Details of other persons having signed the quarterly report

Name: **Gavrilov Aleksandr Ilich**

Year of birth: **1973**

Place of work: **Kubanenergo PJSC**

Position: **Director General**

Name: **Skiba Inna Viktorovna**

Year of birth: **1975**

Place of work: **Kubanenergo PJSC**

Position: **Chief Accountant – Head of Department of Financial Records, Accounts And Tax Returns**

II. Information on business activity of the Issuer

2.1. Business performance of the issuer

Figures that characterize issuer's activity are calculated on the basis of data of the accounting (financial) report

Standards (rules) used for making the accounting report – RAS (Russian Accounting Standards)

Unit of measurement for index of performance: **rubles/employee**

Indicator	9 months of 2015	9 months of 2016
Workforce productivity	3 052.8	3 706.24
Debt-to-equity ratio	0.99	0.93
Leverage ratio	0.27	0.29
Debt coverage ratio (profit)	3.55	2.12
Rate of overdue repayment of debts, %		
Level of overdue receivables, %:	51.95	36.7
Level of overdue payables, %:	20.34	54.11

Analysis of the issuer's business activity on the basis of the abovementioned indicators:

The growth of indicator “Workforce productivity” by 21.4% within 9 months of 2016 in comparison with the same period of 2015 is explained by increase in revenue from services by 23.1%.

The reduction of indicator “debt-to-equity ratio” within 9 months of 2016 by 0.06 points occurred as a result of reduction of accumulated loss that influenced the increase of shareholders’ equity by 9.4%.

The “leverage ratio” has reduced by 0.02 points by the results of 9 months of 2016.

2.2. Issuer's Market Capitalization

Market capitalization is calculated as the production of the quantity of shares of the corresponding category (type) and the market price of one share disclosed by the securities market trade organizer.

Unit of measurement: thousand rubles

Indicator	31.12.2015	30.09.2016
Market capitalization	17 226 669	21 158 536

Information on the securities market trade organizer that provided details based whereon calculation of market capitalization is carried out as well as other additional information on securities public circulation at the Issuer's discretion:

Full business name: Closed Joint-Stock Company “MICEX Stock Exchange”

Abbreviated business name: CJSC “MICEX”

Location: 13 Bolshoy Kislovsky per., 125009, Moscow

TIN: 7703507076

PSRN: 1037789012414

Telephone: (495) 363-32-32

Fax: (495) 705-9622

Licenses:

Stock Exchange License No. 077-10489-000001 dated 23.08.2007 issued by the Federal Service for Financial Markets,

License for organization of stock exchange trade within the territory of the Russian Federation in commodity sections: terminal transactions No. 146 dated 20.12.2005, issued by the Federal Service for Financial Markets

Webpage: <http://moex.com/>

The credit is affiliated to the issuer: **no**

2.3.2. Issuer's Credit History

Fulfilment of liabilities by the Issuer under credit and/or loan contracts having been in effect during the last completed financial year and (or) loan agreements, including those concluded by issuing and selling bonds, the principal of which is 5% of the net value of the assets as of the date the last complete reporting period, consisting of 3, 6, 9 or 12 months preceding the conclusion of the respective agreement as well as other credit agreements and (or) loan agreements which the Issuer considers material.

Type and details of obligation	
1. credit line, resolution on securities issue No. 4B02-02-00063-A-001P dated 10.11.2015 series 001P-02	
Terms of obligations and information on its fulfillment	
Business name, location or name of the creditor (lender)	Purchasers of securities
Sum of the debt as of the moment of occurring of obligation, RUR	3400000 RUR X 1000
Sum of the debt as of the end of reporting quarter, RUR	3400000 RUR X 1000
Sum of credit (loan), (years)	10
Average interest on credit (loan), % per annum	12.63
Number of interest (coupon) periods	20
Presence of overdue in interest payments, in case of presence – the	no

total amount of overdue and their volume in days	
Planned term (date) of credit (loan) payment	11.11.2025
Actual term (date) of credit (loan) payment	current
Other information on obligations, specified by the issuer at its discretion	no

Type and details of obligation	
2. credit line, resolution to issue securities No. 4B02-01-00063-A-001P dated 10.11.2015 series 001P-01	
Terms of obligations and information on its fulfillment	
Business name, location or name of the creditor (lender)	Purchasers of securities
Sum of the debt as of the moment of occurring of obligation, RUR	3600000 RUR X 1000
Sum of the debt as of the end of reporting quarter, RUR	3600000 RUR X 1000
Sum of credit (loan), (years)	10
Average interest on credit (loan), % per annum	10.44
Number of interest (coupon) periods	20
Presence of overdue in interest payments, in case of presence – the total amount of overdue and their volume in days	no
Planned term (date) of credit (loan) payment	21.11.2025
Actual term (date) of credit (loan) payment	current
Other information on obligations, specified by the issuer at its discretion	no

2.3.3. Issuer's liabilities arising from guarantees provided to third persons

The specified liabilities do not exist.

2.3.4. Issuer's other liabilities

There are no other liabilities unrepresented in the balance sheet that may substantially affect the financial status of the Issuer, one's liquidity, sources of funding and conditions of their use, as well as the results of activity and expenses.

2.4. Risks related to acquisition of issue-grade securities being placed (placed)

Issuer's risk management policy:

“Rosseti” JSC Board of Directors approved the Strategy of development and improvement of internal control system of “Rosseti” JSC and subsidiaries and affiliates of “Rosseti” JSC (Minutes of meeting No. 143 dd. 13.02.2014), that determines the current and target condition of internal control and risks management system of “Rosseti” PJSC and its subsidiaries and affiliates.

To implement this Strategy the Issuer’s Board of Directors approved Policy of internal control and Policy of risks management of Kubanenergo PJSC (Minutes of meeting No. 233/2016 dd. 18.03.2016) that are aimed at timely revealing and providing of preventive actions on minimization of risk (control procedures) to decrease the possibility of financial and other losses that influence at reaching the goals of the Company. The Policy of the Issuer on risks management requires the necessity of compliance with the following principals:

- 1) establishment and protection of the Company's property (the System of Risks Management contributes to the achievement of goals and improvement of productivity, ensuring health and safety employees, ensuring that the safety of all the Company's activities comply with legal and regulatory requirements, environmental protection, improve service quality, operational efficiency, control and reputation);
- 2) Risk management is an integral part of all organizational processes (risk management is not a separate activity that is separate from the activities and processes in an organization; it is a part of management’s commitment and an integral part of all organizational processes, including strategic planning and all project management processes and changes) ;
- 3) Risk management is part of the decision-making process;
- 4) Risk management is systematic, structured and well-timed;
- 5) Risk management is based on the best available information;
- 6) Risk management is transparent and takes into account the interests of stakeholders;
- 7) Risk management is dynamic, iterative (repetitive) and responsive to changes;
- 8) Risk management contributes to the continuous improvement of the organization;
- 9) responsibility for risk management – all participants of the System of Risks Management are responsible for the identification, assessment, analysis and continuous monitoring of risks in the framework of its activities, the development and implementation of the necessary measures for risk management, continuous monitoring of the effectiveness of risk management measures;
- 10) the principle of optimality (analysis of the ratio of expenses for implementation of measures for the risk and impact of the implementation of these measures, including correspondence between the level of complexity of the System of Risks Management and level of complexity and the degree of importance the object, the is analyzed in terms of risk);
- 11) the unity of the methodological framework. Risk management (identification, analysis, assessment and monitoring of risks, development and monitoring of the effectiveness of risk management) are carried out on the basis of approaches and standards, common to all structural units of the Issuer.

Every quarter the Issuer collects and analyses information on internal and external factors that can negatively affect at Issuer’s goals achieving. For minimization of consequences from risks implementation the Issuer developed and carried out the events on prevention of negative consequences; at the same time there are political and economic factors that influence the activity of “Kubanenergo” PJSC in respect of which the Issuer cannot guarantee that events aimed to overriding of possible negative situations can change the situation for the better because these risks factors are out of Issuer’s control.

2.4.1. Industry Risks

The Issuer is a natural monopoly, whose activities are subject to government regulation. In connection with the restriction of growth of tariffs for transmission services for end-users at the level of the RF Government, the likelihood of establishing a tariff lower than the economically justified level is estimated as high.

To prevent and mitigate the impacts from implementation of this risk the Company provides supporting materials to regulatory authorities, that confirm level of economically feasible expenses of the Issuer, upholds the position on necessity of outrunning growth of expenditures, as strategic Company, collective fund holder of Krasnodar region and Republic of Adygea, forms and send disputes to Federal Antimonopoly Service of the Russian Federation.

The Issuer is exposed to risks of reducing of revenues amount in connection with changing of structure of electric energy transmission relating to accepted one while tariffs were approved, and risks of changing of legislation in sphere of tariffs setting.

The following events are implemented to minimize risks:

- 1) interaction with tariff regulatory authorities concerning questions related to accounting of losses that were caused by determining at the federal level the sums of falling out income from applying non-regulated price at necessary gross revenue of the Issuer in the next period of tariff regulation;
- 2) preparation and submission to authorities of state regulating of tariffs the propositions on technological electric energy/power consumption taking into account dynamics of productive supply for purposes of forming of consolidated balance forecast for production and delivery of electricity for the next year;
- 3) development and implementation of Programme of increasing of electric energy efficiency and its coordination with administration of the regions;
- 4) development and implementation of eth Programme of cost management.

The issuer's sphere of influence in decision-making the bodies of tariff regulation is limited, and the issuer cannot guarantee that the measures aimed at minimizing the consequences will be as effective as possible.

The Issuer is exposed to risk of scarcities of source of funding of events on agreements on implementation of technological connection (hereafter – technological connection) due to approving by regulating authority of paying rate for technological connection lower of economically feasible level. One of the factors of this risks arising is introduction of amendments to legislation of the Russian Federation (Federal Law No. 35-FZ dd. 26.03.2003 “On power industry”) on excluding of power receivers of maximum capacity 150 kW from paying for technological connection of investment component for covering of charges for construction of power supply network facilities (from 1 October of 2015 – no more than 50% from amount of specified expenditures, from 1 October of 2017 – excluding this expenditures from paying for technological connection).

To minimize risk the Company cooperates with tariffs regulatory authorities, forms correct scope of obligation on technological connection agreements, develops project documents on scope of obligations on technological connection agreements, submits in regulatory authorities the additional supporting materials, and adopts economic feasibility of paying rate for technological connection.

Risk of antimonopoly legislation is evaluated by Company as medium.

The reason of risk implementation is non-fulfillment of obligations of the Issuer on technological connection on concluded agreement on technological connection (because of scarcity of funds and large number of agreements on technological connection), it may lead to paying of forfeit by the Company. To avoid the risk the Issuer plans to implement its obligations on technological connection agreement in full.

Risk of reducing the amount of services on electric energy transmission.

Risk of reducing the amount of services on electric energy transmission is industry risk. The reduction of electric energy consumption can be the consequence of external factors influence such as: economy crisis and production decline, construction of electrical generation facilities by customers, extreme weather events, industrial accidents, and industrial disasters. Potential influence of these factors may influence on changing of revenue of the Issuer.

In connection with economic development of the region where the Issuer operates, there is a dynamic of increasing of amounts of electric energy consumption for the last few years. This risk

is evaluated as medium. The Issuer implements monitoring of current and expected economic situation in region and in country, fulfills preparation works for appropriate work of power equipment in all seasons, carries out maintenance and repair of power facilities.

Operational risks

In the production process the Issuer is exposed to risks associated with physical deterioration, abuse and critical changes in the parameters of the equipment.

The main ones are:

- 1) deterioration of performance and economic indicators of electric equipment;
- 2) threat of failures with partial or full undersupply of electricity with corresponding negative social consequences;
- 3) failure to comply with the obligations under the contracts for the provision of electricity transmission services;
- 4) negative environmental effects.

In order to decrease the risk of the group the issuer takes the following steps:

- 1) scheduled repair and maintenance of equipment;
- 2) technical re-equipment, reconstruction and new construction;
- 3) regular optimization of structure and amount of components and spare parts in reserve and other;
- 4) providing of industrial security and manufacturing control.

Issuer assesses the level of risk above the average and believes that the negative factors will not materially affect its activities and performance of obligations on its securities.

Price risks

Provision of electricity transmission services includes as well the purchase of raw materials, services, equipment and other materials used by the Company in its operations. The price increase is mainly explained by inflationary pressures and the impact of macroeconomic factors. During the economic instability the risk of augmentation of cost for goods and services used by the Company increases.

In order to minimize these risks, the issuer uses the position of a large consumer and purchases the material and technical resources and selects the service providers through a competitive and regulated procurement of raw materials, production and other services.

2.4.2. Country and regional risks

Risks associated with the political and economic situation in the country and region

The worsening of economic and political situation in the country and the region are main risk factors for the Company. Since the Issuer operates only on internal market, government of the Russian Federation develops programmes on import substitution including in regions where the Issuer operates, it leads to increasing of amount of electric energy consumption. Increasing of energy efficiency and adoption of energy-efficient technologies are development priorities of economics.

In the event of significant political instability, which can negatively affect the operations and earnings, the Issuer takes measures of crisis management, reduces as much as possible the expenses, and investment plans.

Additionally, there are risks associated with military conflicts, introduction of a state of emergency, natural disasters that may have consequences as follows:

- Deterioration of the whole national economy status and, consequently, of the Issuer's financial status;
- Detriment to the Issuer's properties that may negatively affect one's ability to timely and fully fulfil one's liabilities to consumers and counterparties.

The Company operates in the Krasnodar Territory and the Republic of Adygea. The regions where the Issuer carries out its activity are politically stable with the risk of a military conflict or a state of emergency occurrence there due to internal causes being minimal. At the same time,

because of the proximity of the republics of the North Caucasus region, there is a considerable risk of terrorist acts; for its minimization, the Issuer actively cooperates with state bodies in charge and takes coordinated measures to ensure security of production. The Issuer has elaborated and is carrying out target arrangements for protection of the Issuers' energy facilities against subversive or terrorist acts. The Company established a permanent working group on combating terrorism in the power distribution facilities in the region. To compensate for damage of the effect of emergency circumstances associated, inter alia, with natural disasters, the Issuer concludes property insurance contracts.

Sharp regional scale changes (environmental, political, demographic, social) are unlikely, but their emergence will doubtlessly affect the Company's activity.

Taking into account the level of the region's transport infrastructure development, the risks of interruption of transport communication due to difficulty of access or remoteness of location are minimal.

In the Issuer's opinion, the situation in the region will have a favourable effect on the Issuer's activity; there existing no reasons to expect that a change of the situation in the region will entail the Issuer's failure to fulfil one's liabilities.

2.4.3. Financial risks

- Risk of interest rates change:

The Issuer attracts short- and long-term borrowings from the Russian financial market. Since the Issuer operates in the Russian Federation, inflation growth in the Russian Federation is one of the factors of overall growth of interest rates.

A substantial increase of interest rates on credits and loans may entail appreciation of the Issuer's debt servicing. For optimization of the debt portfolio structure and reduction of its servicing costs, the Issuer strains after use of credits and loans with the fixed interest rate which results in significant reduction of the above risk. Issuer's supposed actions in the event of negative effect of interest rates change on one's activity: Attraction of longer-term credits to avoid negative effect of interest rates short-term fluctuations and diversify funding sources.

- Risk of changes of foreign currencies exchange rates:

Carrying out one's core business activity within the territory of the Russian Federation, the Issuer has neither investments into foreign companies value of net assets whereof is exposed to the risk of currency exchange rates fluctuations nor revenues or expenses expressed in terms of foreign currency. Risks related to exchange rate fluctuations are not factors of direct impact on the financial and economic activities of the Issuer, but may lead to augmentation of prices for energy equipment. Currently, this risk is assessed as medium. In order to reduce the risk, the Company is implementing a program of import substitution. In case of a further weakening of the national currency the issuer plans to analyse the risks and make appropriate decisions in each particular situation.

Risk of reducing the customer's prices

Changes in the consumer price index to some extent affect the Issuer's rate of return and its financial and business activity results, but their effect is not a direct dependence factor. Indirect dependence of the Issuer's rate of return on changes of the consumer price index is mainly conditioned by the fact that tariffs for services for transmission of electric energy cross electric power grids are established by state tariff bodies on the basis of justified expenses on their provision and fully or partially compensate for growth of the Issuer's expenses associated with inflation. However, during high inflation periods, risks of reduction of the tariff compensatory component amount and of solvency of the Issuer's major consumers grow up.

Taking into account the abovementioned information, there are no guarantees that possible increase of consumer prices will not lead to a drop of the Issuer's rate of return in future.

Inflation risks

The current inflation level may have effect on the Issuer's financial status. For minimization of financial risks associated with inflation processes and affecting the financial results of activity, the Issuer is implementing an integrated program for analysis of financial risks, planning and appraisal of actual profitability of activity; one identifies return rate indices that are indicative of the Issuer's level of cost-efficiency, normative values of financial coefficients characterizing the Issuer's solvency and liquidity, which enable one to promptly detect drawbacks in the Issuer's work and take measures for their elimination.

As well as in accordance with RF Government Regulation No. 1178 dd. 29.12.2011 "On price formation in sphere of regulated prices (tariffs) in power industry" when regulating electricity tariffs inflation level should be taken into consideration (consumer price index), that was defined in the prognosis of social and economic development of the Russian Federation. Thus, the Issuer considers these risks as moderate.

The Issuer's financial reporting indices are most badly subject to changes resulting from the effect of the abovementioned financial risks including risks, the possibility of occurrence and character of changes in the report: The index of accounts receivable accruing due to counterparties' incapability to pay for the Issuer's services is most badly subject to change in the Issuer's reporting resulting from the abovementioned risks occurrence. The probability of occurrence of this risk is not high and is related to situation in the country in general, inflation and changes of currency exchange rates and their effect on the Russian economy as a whole. Deterioration of the economic situation in Russia may affect growth of costs of electric energy transmission across the Issuer's electric power grids, which will lead to profit reduction if the established tariffs remain in effect. In order to reduce this risk, the issuer carries out the work on receivables management aimed at optimization of its amount and repayment of debts.

2.4.4. Legal risks

The Issuer carries out one's activity only at domestic market; consequently, the legal risks are considered only from the corresponding point of view.

Risks associated with tax and environmental legislation and customs and currency regulation.

Since no special taxation mode is applicable to the Issuer's activity and the Issuer has no overdue tax and levy indebtedness to budgets of all levels, the Issuer's tax risks are considered as the minimum within the framework of a conscientious taxpayer's activity.

In the shorter term, the Issuer does foresee emergence of any significant risks in one's financial and business activity associated with changes in tax and civil legislation.

Changes of currency and customs legislation of the Russian Federation are of no relevance for the Issuer's activity and, consequently, do not entail emergence of legal risks.

In case of changes and/or launch of requirements for licensing the Issuer's core activity the Issuer will take all necessary measures for obtaining the licenses and permissions required.

The Issuer has licenses for carrying out other activity data whereon is given in Clause 3.2.5 of this report. The Issuer carries out regular work for prolongation of the licenses necessary for conduction of its business activity. The Issuer's exposure to the above risk may be considered insignificant. Risks connected with absence of possibility to extend the license of the Issuer are minimal and cannot influence on Issuer's fulfillment of obligations on placed securities.

2.4.5. Reputational risks.

The risk that the issuer of incurs losses due to such factors as a reduction in the number of customers (counterparties) because of the formation of negative image of financial stability, the financial position of the issuer, the quality of the work, is considered as minimal. The Issuer is a natural monopoly, there is an annual increase in the number of electricity consumers. In addition, the Issuer developed a good practice for long-term cooperation with its partners.

2.4.6. Strategy risks

The Issuer, being a part of the single distribution grid complex of Russia, seeks to achieve the objectives defined at the national level. On 3 April 2013 the Russian Government approved the development strategy for the electric grid complex of the Russian Federation. Due to the fact that the Issuer is a subsidiary of Rosseti, the largest Russian backbone grid company, the Issuer is a participant in implementation of policies and programmes on activities (business processes) of Rosseti PJSC. The decision to start the implementation of a specific strategy (programme) in the activities of the Issuer's shall be accepted by the Board of Directors.

The probability of the risk of the Issuer losses arising from errors (defects) made in management decisions, defining the strategy and activities of the Issuer, is assessed as low.

Measures to prevent the occurrence of this risk are:

- elaboration of proposals and scenarios to improve the implementation of specific policies and programmes;
- analysis of effectiveness of particular strategy, adoption of managerial solutions by the results of analysis
- development and implementation of key performance indicators to achieve policies, linking them with bonuses of managers of the Issuer;
- continuous monitoring by the structural units of the Issuer's the ratio of the cost of implementing a specific strategy to the received profit and submission to the Board of Directors of the Issuer of the information for decision-making (including, by definition, the quantity and quality of resources)

2.4.7. Risks connected with Issuer's activity

Risks connected with current legal trials where the Issuer participates.

The Issuer participates in legal trials the results of which can influence financial and operational activities of the Issuer. Enforcement proceeding is implemented in regard to accounts and loan receivables of the Issuer.

The Issuer carries out monitoring of judicial practice that allows to use this information for reaching positive judicial decision for the Issuer. Currently there are no changes in judicial practice that can negatively affect at results of current trials and thus on the results of business activity of the Company.

Risks connected with potential liability of the Issuer on debts of third parties including affiliates of the Issuer. The Issuer has affiliate joint stock companies with owning of 100% shares in the authorized capital. As the parent Company for subsidiaries and affiliates, the Issuer can be responsible for their debts. These liabilities can negatively effect on results of financial and operational activities of the Issuer. The possibility of specified risks is evaluated as medium. Risks connected with possibility of loss of customers that constitute at least 10% of total revenue from sales of products (work, services) of the Issuer.

The Company cooperates with main customers and is monopolist in sphere of services rendering on electric energy transmission in the regions of the Issuer's activity. The possibility of loss of main customers is minimal.

Risks in manufacturing activity of the Issuer:

- 1) systematic interruption of power supply of customers in the result of accidents and disturbances at grid sections and substation equipment;
- 2) violation of requirements of GOST 31144-2013 on providing the quality of electric energy;
- 3) disturbance of regime of electric energy transmission and reducing of quality of rendered services;
- 4) non-implementation of maintenance (including diagnosis) and repair in time;

- 5) low quality of repair works implementation;
- 6) methodological mistakes in repair programme;
- 7) incorrect ranking of reparable facilities;
- 8) emergency situations in related networks, that can breakdown the equipment of the Issuer;
- 9) excessive losses of electric energy.

To reduce these risks the Issuer pays much attention to development of electric grid complex with using of science based engineering decisions and technologies, tested in operation, modern electric equipment.

Increasing of tariffs on rendered services by the Issuer, due to increasing of “external” expenses influence on risks: purchased electric energy on losses compensation, changing of amount of payment of services for electric energy transmission of “FGC UES” PJSC and other factors.

Investment risk

Implementation of investment programme of the Issuer demands fund raising both owned and loaned, on conditions satisfying the requirements of RAB-regulating.

One of the investment risks is risk of reduction of sources of financing of Company’s investment programme. Currently this risk is rated as minimal and is determined by influence of the following factors: decline in the ruble, upturn in inflation, and rise in cost of debt capital.

To decrease the investment risk the investment programmes of the Issuer are planned taking into account following key criterions of efficiency:

- increasing of reliability and availability of network infrastructure;
- decreasing of amortization and modernization of facilities of power supply network system;
- reaching of high load of commissioned capacity;
- optimization of engineering solutions out of necessity of excluding the usage of imported equipment and materials, cost of which has high dependence from rate of exchange.

To minimize risk of untimely and incorrect implementation of investment programme, the Issuer controls deadlines and quality of investment projects.

III. Detailed information on the Issuer

3.1. History of foundation and development of the Issuer

3.1.1. Information on the Issuer’s business name (registered name)

Issuer's full business name: **Public Joint-Stock Company of Power Industry and Electrification of Kuban, Публичное акционерное общество энергетики и электрификации Кубани**

Date of introducing the current company name: **22.06.2015**

Short company name: **Kubanenergo PJSC, ПАО "Кубаньэнерго"**

Date of introducing the current company short name: **22.06.2015**

Company’s name (name of non-profit partnership) registered as trade mark or service mark

Information on registered trademarks:

On 30.01.2013 and 19.07.2013 (certificates No.479755 and No.4922215) the Federal Intellectual Property Service registered trademarks (service marks) in favour of the Company in Russian language – КУБАНЬЭНЕРГО. Duration of the registration of a mark ends on 27.12.2021.

Full company name: Акционерное общество открытого типа энергетики и электрификации Кубани, Open Joint-Stock Company of Power Industry and Electrification of Kuban

Short company name: **“Kubanenergo” OJSC**

Date of introducing the name: **10.02.1993**

Ground of introducing the name: **State registration of the issuer’s Charter (certificate of stage registration No.127 dated 10.02.1993)**

Full company name: Открытое акционерное общество энергетики и электрификации Кубани, Joint-Stock Company of Power Industry and Electrification of Kuban

Short company name: **“Kubanenergo” JSC**

Date of introducing the current company name: **29.05.1996**

Ground of introducing the name: **State registration of adjustment to the issuer’s Charter , No.2858 dated 29.05.1996. The charter was approved at the AGM on 26.04.1996, minutes of meeting No.4**

Full company name: Открытое акционерное общество энергетики и электрификации Кубани, Joint-Stock Company of Power Industry and Electrification of Kuban

Short company name: **“Kubanenergo” JSC**

Date of introducing the name: **30.06.1998**

Ground of introducing the name: **State registration of adjustment to the issuer’s Charter, No.7316 dated 30.06.1998. The charter was approved at the AGM on 26.04.1996, minutes of meeting No.4**

3.1.2. Data on the Issuer’s State Registration

Data on primary state registration

State registration number: **127**

State registration date: **10.02.1993**

Name of the body having carried out primary state registration: **Administration of the Oktyabrsky District of Krasnodar**

Data on legal entity registration;

Primary legal entity state registration number: **1022301427268**

Registration date: **17.09.2002**

Name of registering body: **Inspectorate No. 3 for Krasnodar of the Ministry of Taxation of the Russian Federation**

3.1.3 Information on establishment and development of the Issuer

The Issuer has been founded for an indefinite period.

Brief description of the Issuer's foundation and development history: Issuer's establishment objective, mission (if any) and other information on the Issuer's activity required for taking decisions on acquisition of the Issuer’s securities:

History of Kuban electrification began in the late 19th century with the commissioning of power

plants intended for provision electric lighting of settlements, energy supply of Novorossiysk elevator and Ekaterinodar tramway. Until 1917 there were 353 plants with total capacity of 13.7 MW (the largest in Ekaterinodar, Novorossiysk, Armavir, Yeisk, Maikop, Sochi, Anapa, Labinsk, villages Starominskaya, Krymskaya and Tuapse harbour). With the establishment of Soviet power in the Kuban region in April 1921 the Kuban-Black Sea Economic Council established "Elektrootdel" which main tasks were management of facilities at existing power plants, as well as construction of new ones.

In 1922 association "Vodeltram" was founded in the capital of Kuban region, consisting of municipal and utility services for water supply, transport (tram) and electricity. The length of the transmission lines was 45 km, electric networks were designed for a voltage of 2 kV.

With the approval of electrification plan began the rapid construction of power plants, but interrupted by the Great Patriotic War. By 1940, the total electric capacity of power stations reached 100 MW, and electricity generation in 1940 totaled 394 million kWh

In 1942 - 1943 Kuban's territory was under occupation, the power base was almost destroyed.

In order to restore the ruined power network of the Kuban and for its further development, by the Order of the People's Commissar of the USSR from March 14, 1944 No.66 the Krasnodar district energy management "Krasnodarenergo" (REU) was organized. The principal activities of RG were the production, distribution and sale of electricity and thermal energy, recovery and development of energy systems, power control and supervision over the operation of power equipment on plants. The jurisdiction of the RG on the Rights of the independent self-supporting enterprises were power plants, substations, network areas, repair-mechanical plant, the central warehouse, planning and surveying offices, industrial and research laboratory.

By 1959 the installed capacity of Kuban power system was 337 MW (excluding diesel and isolated generating plants).

In the late 50s - early 60s we installed transmission networks of 110 kV and 220 necessary for connecting the power system of southern Russia and the Caucasus, railroad network was electrified, electricity distribution facilities were built, electrification of rural areas reached 86% .

In 1963, in accordance with the order of USSR Council of Ministers dated 14.05.63, city and rural electric grids were transferred to regional electricity board.

The rapid growth of electricity consumption by the national economy of Kuban in 1970-1980 led to the construction of a large number of transmission lines and substations, switching to a higher voltage classes - 330 and 500 kV. The total length of transmission lines reached 90 thousand km and amount of substations of 35-500 kV exceeded 700.

On November 1, 1988, in accordance with the order of USSR Council of Ministers dated 02.07.87 # 812, Krasnodar district network "Krasnodarenergo" was discontinued, and on the basis of its subordinate enterprises and organizations Krasnodar Production Association of Power industry and Electrification "Krasnodarenergo" was established.

In 1993, in accordance with Russian legislation on privatization of state and municipal enterprises Krasnodar Production Association of Power industry and Electrification "Krasnodarenergo" was reorganized into "Kubanenergo" JSC with the following branches Krasnodar TPP, "Energonadzor" repair and construction company, training center, recreation centre, summer camp. In accordance with Presidential Decree of 15.08.1992 # 923 "On control of the power industry of the Russian Federation in the context of privatization" 49% of the Company's shares were transferred as the payment of the authorized capital of RAO "UES of Russia" in 1993, while the remaining 51% stake of "Kubanenergo" were acquired via private subscription by employees of the Company and other persons/entities entitled to benefits under the State program of privatization.

In 2003-2006 "Kubanenergo" JSC, as well as power industry in general, has undergone large-scale reforms.

The main objective of the Russian electric power industry reformation is the increase of efficiency of the enterprises of the branch, creation of conditions for the latter development on

the basis of investment process motivation and provision for reliable and uninterrupted supply of energy to consumers.

During the reformation, “Kubanenergo” JSC got rid of service and non-core types of activity as well as dispatching functions by way of entrusting them to dedicated special entities:

- Operative dispatching management functions were transferred to Open Joint-Stock Company “System Operator of the Unified Energy System”;
- Open Joint-Stock Company “Krasnodarenergoremont”, “Krasnodarenergosetremont”, “Recreation Centre “Energetik” and Recreation Centre “Plamya” were founded;
- Non-State Non-profit Educational Institution “Kubanenergo” Training Centre” was founded where workers of the Company and other power industry enterprises advance their qualifications and master new trades.

In 2006, as the result of reorganization of “Kubanenergo” JSC, the following open-end joint-stock companies appeared:

“Kuban Generating Company”, with the generating capacities of the Company (Krasnodar CHP and minor-scale hydroelectric power plants) included in one’s authorized capital;

“Kuban Trunk Grids”, authorized capital whereof was composed of electric power grid facilities related to the Unified National Electric Power Grid (with voltage = 220 kV and higher);

“Kuban Energy Selling Company” discharging the functions of a guaranteeing electric energy supplier, additionally in charge of electric energy purchase in the wholesale market and supply to end consumers.

At present “Kubanenergo” PJSC is the biggest electric power grid company in the Krasnodar region and Republic of Adygea that transmits and distributes electric energy to consumers via 110 kV electric power grids with voltage or less between populated regions, rural settlements and cities and district centres of the Krasnodar region and Republic of Adygea including Sochi.

“Kubanenergo” JSC carries out its main activity under conditions of natural monopoly regulated by the state in the part of setting tariffs for electric energy transmission and provision for consumers a non-discriminatory access to electric power grids.

Since July 1, 2008 “Kubanenergo” has been a dependent company of “IDGC Holding” JSC (now “Russian Grids” JSC) having received a pack of the Company’s voting shares through legal succession under a dividing balance sheet as a result of reorganization of “RAO UES of Russia” in the form of separation.

The Company mission is reliable, efficient and safe transmission of electric energy to consumers and provision of shareholder with stable income.

Strategic objectives of the Company:

1. provision of quality, reliable and uninterrupted energy supply to consumers;
2. reduction of energy facilities wear;
3. bringing operational efficiency indices to the level of efficiency of distribution grid companies in advanced countries by 2020;
4. creation of a reserve of electric power grids carrying capacity to a volume outstripping the development of economy by 3 years;
5. adoption of innovative technologies corresponding to the world’s best standards in the field of electric energy distribution at all stages of the technological process;

6. provision of high rate of return on investments in the distribution grid sector at the level of cost-efficiency of companies operating under comparable market activity conditions in the Russian Federation.

7. Implementation of federal target programme “The social and economic development of the Republic of Crimea and the federal city of Sevastopol until 2020”, approved by RF Government on 11.08.2014 No. 790.

To achieve the stated objectives the Company:

- implements large-scale investment programs coordinated by the Ministry of Energy of the Russian Federation and considering prospects of development of the economies of the Krasnodar Territory and the Republic of Adygea;
- implements the Company’s Financial Recovery Programme;
- is determined to increase the portion of energy facilities repairs using own resources to reduce the cost of repair and ensure the proper level of quality control of repairs;
- seeks to carry out large-scale renovation of fixed assets;
- maintains a high level of professional competence of the Company’s workers through continuous personnel training (including in the sphere of quality, ecology, occupational safety and health);
- constructs the line and substation facilities in the process of grid connection if need.

Information on changes of revenue (proceeds) from core business activity by 10 percent and more compared with the corresponding previous reporting period and causes of such changes:

No changes .

Additional information disclosed in accordance with the Statement on informational policy of the Company:

Electric energy transmission

The main indexes of electric energy transmission of Kubanenergo PJSC (thousand kW*h):

Indicators	9 months of 2015	9 months of 2016
Receipt of electric energy into the Company's grid for its transmission under service contracts	16 298 978.782	16 616 477.02
Electric supply	14 332 497.812	14 603 601.85
Productive supply of electric energy by the "boiler" method per voltage levels	13 101 286.03	13 436 561.47
- high voltage (110 kV and more)	2 907 449.46	2 866 293.16

- medium voltage 1 (35 kV)	849 227.08	829 641.42
- medium voltage 2 (1-20 kV)	3 983 451.21	4 027 114.89
- low voltage (0.4 kV and less)	5 361 158.28	5 713 511.99
Actual losses of electric energy	1 966 480.970	2 012 875.17
Saving (+) / loss (-) of electric energy from the allowed losses	- 178 681.095	-2 709.184

Quarterly forecast for production results and comments

The main purpose of Kubanenergo in 2016 is to pass trouble-free the winter and summer peak loads, the timely implementation of the activities of supervisory authorities to obtain a certificate of preparedness, the performance of investment and maintenance programmes that will create an opportunity for further connection of consumers to the networks of Kubanenergo PJSC and minimization of excessive losses.

To fulfill the targets of electricity transmission it is necessary: to implement the planned structure of productive supply by voltage levels; to eliminate the growth of costs on housekeeping overheads and uncontrolled expenses of the Issuer.

A significant risk in 2016 for electricity transmission is:

- imprecise planning of balances of electric energy and capacities by the regional market participants and Regional Energy Commission of the Krasnodar region
- approval of the mid-year of the electricity transmission tariffs for the newly formed network of related organizations, the emergence of uncompensated costs on them
- in case of transition to payments for network maintenance there increases economic responsibility of sales companies for non-compliance of the actual structure of productive supply to consumers from the planned, by voltage levels
- low payment discipline of energy selling companies, failure to comply with their contractual obligations.

Technological connection of consumers to the Company's electric power grids

The company concluded 8 715 contracts for technological connection to the electric networks with total capacity 159 MW in the 3rd quarter of 2016. Cash collected amounts to 99 million rubles (VAT excluded), proceeds equal to 1.158 million rubles (VAT excluded). The volume of cash was received mostly from consumes having submitted applications for capacity in excess of 150 kW.

In fact, in the 3rd quarter of 2016, 7 495 consumers with total capacity 126 MW were connected (generation considered).

Core production capacities of the Company (as of 01.01.2016):

Length of 110, 220 kV high voltage lines	110 kV overhead lines – 4 962.77 km (route) 110 kV overhead lines – 6 333.25 km (circuits) 220 kV overhead lines – 76.1 km 110 kV cable lines – 78.75 km
Length of medium voltage lines (6 - 35 kV)	Power lines 6-35 kV – 41152.67 km (route) Power lines 6-35 kV – 41983.55 km (route), including: Overhead-35 kV – 6932.52 km (route)

	Overhead -35 kV – 7763.4 km (circuit) Overhead - 6-10 kV – 32556.28 km Cable lines-35 kV – 0.46 km Cable lines- 6-10 kV – 1663.41 km
Length of 0.4 kV low voltage lines	04 kV – 41948.98 km, including: overhead lines – 41475.55 km cable lines – 473.43 km
Number/capacity of substations with high (110 kV) basic voltage	219 substations/7012.0 MVA
Number/capacity of substations with high (35/6-10 kV) basic voltage	496 substations/2420.7 MVA
Number/capacity of transformer substations (6-35/0.4 kV)	22508 substations/4556.52 MVA

Additional information of Company's business activity

Economic indicators:

	Indicator	9 months of 2015	9 months of 2016
1	Revenue from selling products (services), total,	25 359 724	31 217 646
2	Production (services) costs, total	22 925 699	26 076 618
3	Gross profit, total	2 434 025	5 218 325
4	Net profit, total	842 866	2 145 528

Changes in financial and economic activity of Kubanenergo in 9 months of 2016 compared with 9 months of 2015, are characterized by the following:

- increase in revenue from sales of products (services) in the reporting period by 857.9 million rubles or 23.1%, due to increase in revenue from electricity transmission services by 15.6%;
- increase in revenues for services on technological connection by 1 960.7 million rubles or 6.7 times;
- increase in cost of sales, including management expenses, by 3 150.9 million rubles or 13.7%;
- increase in net profit for the reporting period by 1 302.7 million rubles or 1.5 times

The accounting policy of the Company allows the structuring of revenue and cost of goods sold (services) business areas with access to the overall financial performance of the company.

Expenditures structure, thousand rubles:

	Expenditures	9 months of 2015	9 months of 2016
1.	Material expenditures	4 847 898	5 760 962
	including		
1.1.	Purchased power for loss compensation	4 232 083	5 085 661
1.2.	Purchased energy for industrial and domestic needs	64 441	71 108

1.3.	Materials and supplies	551 374	604 193
2.	Work and production services	10 451 600	11 352 325

2.2.	Other works and production services	366 365	347 506
3.	Labour payment expenditures	2 500 892	2 961 227
4.	Insurance payments	737 666	853 307
5.	Depreciation	2 328 002	2 699 479
6.	Misc.	2 059 641	2 449 318
	including		
6.1.	Payment of third party services	524 593	552 536
6.2.	Management services	66 490	66 482
6.3.	Insurance expenses	315 344	432 619
6.4.	Taxes and levies	920 830	1 331 436
6.5.	Provision for estimated liabilities	-6 859	10 149
6.6.	Provision for unutilized vacation	22 925 699	26 076 618
7.	Production and sales expenses	4 847 898	5 760 962

Cost of goods manufactured (in million rubles)

Expenses of Kubanenergo PJSC in 9 months of 2016

- Purchased energy for compensation of losses
- Materials, raw materials, energy for industrial and domestic needs
- Services of network companies on electricity transmission
- Other works and production services
- Labour payment expenses
- Insurance payments
- Depreciation
- Misc.

Performance indicators

Indicator	9 months of 2015	9 months of 2016
ROE, %	2,77	6,44
ROA, %	1,39	3,33
ROTA, %	1,93	5,01

Debt to equity ratio

Indicator	9 months of 2015	9 months of 2016
Debt to equity ratio, %	1,79	1,86

The debt to equity ratio shows the share of borrowed funds in the capital structure of the company. By the results of 9 months of 2016 this index improved by 0.07 points and reached 1.86. There is a positive trend.

The dynamics of growth (falling) incomes, thousand rubles:

#	Indicator	9 months of 2015	9 months of 2016
1	Net proceeds from selling production, service, total, including	25 359 724	31 217 646
1.1.	from transmission and transit of electric energy through networks	25 007 985	28 904 244

1.2.	from grid connection services	291 011	2 251 758
1.3.	other products (services) of core activity	60 728	61 644

By the results of 9 months of 2016 revenues from sales of products, works and services amounted 31 217.6 million rubles, which is 5 857.9 million rubles or 23.1% higher than for the 9 months of 2015. The main influence on the increase in this index had an increase in revenues for the electricity transmission services by 3 896.3 million rubles or 15.6% and increase in revenue from grid connection services by 1 960.7 million rubles or 6.7 times.

Expenditures:

#	Expenses for production and selling of products	mln rubles	Growth rate, %
			9 months of 2015/ 9 months of 2016
1	9 months of 2015	22 925.7	113.7
2	9 months of 20156	26 076.6	

Growth of the cost for production and sales in the 2nd quarter of 2016, compared with the same period of 2015, by 652 million rubles was due to increase in expenses for: purchased energy for losses, network services for electricity transmission companies, depreciation, taxes and levies. The cost of purchased energy to compensate losses grew by 853.6 million rubles due to the increase in the average prices for purchase of electricity losses.

The costs of network service companies for the transfer of power grew by 919.6 million rubles. It is due to increase in the actual balance of power flow with respect to the same period of the last year and tariff on support of networks. Also there was an increase in volume of electricity transmitted over networks of allied network organizations.

Increase in depreciation expenses by 371.5 million rubles is due to the commissioning of fixed assets of the electric grid complex in the framework of the approved investment programme of the Company.

Increase in costs on taxes and fees by 117.3 million rubles occurred because increasing of the size of the property tax as a result of the implementation of the approved investment programme of the Company.

Provision for estimated liabilities, that formed on disputed claims of electric energy suppliers for electricity transmission in accordance with PBU 8/2010, approved by Order of the Russian Finance Ministry No.167n on 13.10.2010, was charged for 9 months of 2016 in the amount of 1 331.4 million rubles, including reserve for disputes with Territorial Grid Organizations in amount of 428.8 million rubles, the differences in capacities with FGC UES PJSC in the amount of 428.8 million rubles. For the same period in 2015 the following provisions for estimated liabilities totaling 920.8 million rubles were accrued: reserve for disputes on compensation of losses in the amount of 106.6 million rubles; provision for disputes with the Territorial Grid Organizations in the amount of 814.2 million rubles.

The dynamics of other indicators is insignificant.

The structure of revenue and profit by type of activities, thousand rubles

#	Indicator	9 months of 2015	9 months of 2016
1	Net proceeds from selling production, service, total, including	25 359 724	31 217 646
1.1	Production (services) of core activity, total, including:	25 359 724	31 217 646

1.1.1.	network services	25 298 996	31 156 002
1.1.1.1	from transmission and transit of electric energy through networks	25 007 985	28 904 244
1.1.1.2	from grid connection services	291 011	2 251 758
1.1.2.	electric energy to internal consumers	0	0

1.1.4.	other production (services) of core activity	60 728	61 644
1.2	Production (services) of non-core activity	0	0

By the results of 9 months of 2016 revenues from sales of products, works and services reached 31 217.6 million rubles, which is 23.1% higher than the corresponding figure of 9 months of 2015. The main influence on the increase of this indicator has had an increase in revenues for network services by 5 857.0 million rubles or 23.2%, including an increase in revenue from electricity transmission services by 3 869.3 million rubles or 15.6%, as well as increase in revenue from technological connection by 1 960.7 million rubles or 6.7 times%.

Quarterly forecasting of financial results and comments:

The activities of the Company are planned on the basis of the following indicators:

- consolidated forecast balance of production and supply of electric energy within the Unified Energy System of Russia by subjects of the Russian Federation;
- forecast of growth in tariff on electricity transmission services;
- forecast of growth in consumer prices;
- forecast of growth in purchase of electricity to cover energy losses;
- amount of electricity losses, taking into account the depreciation of equipment, modes of loads on networks, business losses, etc.

Information on changes in basic material and goods (raw material) prices for more than 10% within the corresponding reporting period compared to the corresponding reporting period of the previous year

Increase of prices on:

- **self-supporting insulated conductor by 10%**
- **uninsulated wires AS 150/24 by 12%**

Reduction of prices on: high-voltage bushing of types RIP with polymer external insulation 90-40.5/1000 O1 by 13.5%

Portion of import in the material and goods supply, the forecast with respect to accessibility of import in the future and possible alternative sources of import

The share of imports in the supply of materials and products is 0.73%.

Forecast of availability of import sources in the future is favourable.

Possible alternative sources are currently not available.

3.2.4. Target markets of the Issuer's products (works, services)

Core markets wherein the Issuer carries out its activity:

The Company is the largest electric power grid company in the Krasnodar Territory and Republic of Adygea carrying out transmission and distribution of electric energy across electric power grids with voltage equal or below 110 kV among the populated localities, in rural settlements and individual cities and regional centres of the Krasnodar Territory and Republic of Adygea including Sochi.

The market share on services of energy transmission was 70.26% within 2015 and 70.35% within 9 months of 2016.

“Kubanenergo” PJSC carries out its main activity under conditions of natural monopoly regulated by the state to the extent of establishment of tariffs for electric energy transmission and provision for non-discriminatory consumers’ access to electric power grids. Taking into account the growing demand for electric energy in the region, the Company pays great attention to development, reconstruction and increase of carrying capacity of electric power grid facilities, reckoning on increase of one’s services sales volume in future.

Since 01.07.2007 a “boiler” method of settlements for transmission of electric energy is in force in the region, with the “boiler holder” status reserved to “Kubanenergo” PJSC. This means that all energy selling companies marketing electric energy in the regional market pays to “Kubanenergo” PJSC for services for electric energy transmission across electric power grids of the whole regional energy system within the framework of contracts for electric energy transmission while “Kubanenergo” PJSC pays for electric energy transmission services to territorial grid companies.

Since September 22, 2011 an individual calculation scheme based on the “boiler below” principle has been used in the Krasnodar region with regard to LLC “Maykop CHP” Grid Company. Within the framework of this scheme, “Kubanenergo” PJSC provides electric energy transmission services to LLC “Maykop CHP” grid company and receives payment as per the individual tariff established by REC-PTD KT.

In the reporting quarter, the core consumers of “Kubanenergo” PJSC energy transmission services were:

- guarantee suppliers (3) (“Kubanenergobytt” JSC, “NESK” JSC, “Oboronenergobytt” JSC),
- energy selling companies (25) (“MAREM+” CJSC, "Rusenergoresurs" LLC, "Transservisenergo" JSC, "RN-Energo" LLC, "Southern Energy Retail Company" LLC, "MagnitEnergo" LLC, "Mosenergobytt" PJSC, "KES" LLC, "Yugstroy-Energobytt" LLC, "Energy Efficiency" LLC, "Kvant" LLC, "NSC" LLC, "Transneftenergo" LLC, "Ruenergo" LLC, "RegionEnergoKontrakt" LLC, "Mezhregionenergobytt" JSC, "Energobytt" LLC, "Garantenergo" LLC, "KNGK-Energo" LLC, "Alternativ-Energo-Sbyt " LLC, "AER" LLC, "ProfServisTrade" LLC, "EnergoHolding" LLC, "Forest" LLC) – participants of wholesale and retail markets that carrying out its activity on selling of electric energy to final consumers, connected to power grids of the Company and power grids of other Companies;
- number of consumers (110) that concluded with Kubanenergo direct contracts for electricity transmission (“Novorostsement” JSC, “Tamaneftegaz” CJSC, “Kubanzheldormash” CJSC, “Euro Khim-Belorechenskie Minudobreniya” LLC, “Poultry farm “Primorskaya” LLC, “Fanagoria” APF, “Agrofirma stud farm “Pobeda” CJSC, “Kubanskiy bacon” LLC, “Sad-Gigant” CJSC, “Verkhnebakan cement factory” CJSC, “Abrau Durso” CJSC, “Pilot” CJSC, “Novoroslesexport” JSC, “Stud farm “Leninskiy put” JSC, “Stud farm “Gulkevichskiy” CJSC, “RAMO-M” CJSC, “Novomol” LLC, “Uspenskiy sakharnik” CJSC, “Pioneer” CJSC, “Novorossiysk commercial seaport” JSC, “Formika-Yug” LLC, “Kanevskiy Gas fitting plant” LLC, “IPP” JSC), concluded Agreement for the transmission of electricity;
- grid company - transmission and distribution of electricity on the grid to consumers and related distribution companies ("Maikop CHP" LLC).

Factors that may affect the products (works, services) marketing by the Issuer and possible actions of the Issuer to reduce such effect:

Negative factors that may have a negative effect on “Kubanenergo” PJSC products marketing represent political risks associated with decisions of the Government of the Russian Federation on issues related to development of electric power branch and risks associated with relations with local bodies; economic risks associated with state regulation of prices for the Issuer's products; financial risks associated with the conditions and value of borrowed resources attraction; risks associated with operation of core equipment (electric energy transmission) as well as other risks. Currently, the Issuer does not forecast substantial deterioration of the branch situation. In case of substantial deterioration of the branch situation, the Issuer plans to make risks analysis and to take corresponding decision in each specific case.

3.2.5. Information on the Issuer’s licenses

Name of the body issued the license: **Ministry of Natural Resources of the Russian Federation**

Number of licence or document evidencing the access to particular types of activities: **licence for the use of subsurface resources KRD No. 80383VE**

Type (types) of activity for performance of which the issuer obtained a licence or and access: **Recovery of fresh subsurface waters for household, potable and process water supply in Krasnodar.**

Date of issue of licence or access to particular types of works of licence or access to particular types of works: **30.11.2015**

Expiry date of licence or access to particular types of works of licence or access to particular types of works of licence or access to particular types of works: **20.07.2034**

Name of the body issued the license: **Ministry of Natural Resources of Krasnodar region**

Number of licence or document evidencing the access to particular types of activities: **licence for the use of subsurface resources KRD No. 80380BЭ**

Type (types) of activity for performance of which the issuer obtained a licence or and access: **Recovery of fresh subsurface waters for household, potable and process water supply in Tverskaya village, Apsheroniy district**

Date of issue of licence or access to particular types of works of licence or access to particular types of works: **26.10.2015**

C Expiry date of licence or access to particular types of works of licence or access to particular types of works of licence or access to particular types of works: **01.01.2035**

Name of the body issued the license: **North Caucasus Federal service on environmental, technological and nuclear supervision**

Number of licence or document evidencing the access to particular types of activities: **Licence BII-30-003995 series AB 087343**

Type (types) of activity for performance of which the issuer obtained a licence or and access: **operation at explosive/flammable facilities**

Date of issue of licence or access to particular types of works: **11.11.2011**

Expiry date of licence or access to particular types of works: **Perpetual**

Name of the body issued the license: **Self-Regulating Organization NP “Energostroy”**

Number of licence or document evidencing the access to particular types of activities: **0212.02-2010-2309001660-S-060**

Type (types) of activity for performance of which the issuer obtained a licence or and access: installation, strengthening and dismantle structural elements and protecting structures of buildings and structures; assembly and disassembly of valves and equipment of water supply systems; assembly and disassembly isolation valves and equipment of heating networks; the device of external electric networks and communication lines; commissioning works; work on the organization of construction, reconstruction and overhaul that affect the security of capital construction.

Date of issue of licence or access to particular types of works **06.08.2015**

Expiry date of licence or access to particular types of works: **Perpetual**

Name of the body issued the license: **Self-Regulating Organization NP “Energoproject”**

Number of licence or document evidencing the access to particular types of activities: **P-0263-01-2010-0274**

Type (types) of activity for performance of which the issuer obtained a licence or and access: access to works on preparation of design of external supply lines up to 35kV and their constructions that affect the safety of capital facilities

Date of issue of licence or access to particular types of works **17.08.2015**

Expiry date of licence or access to particular types of works: **Perpetual**

Name of the body issued the license: **The Federal Security Service of the Russian Federation in Krasnodar region**

Number of licence or document evidencing the access to particular types of activities: **GT 0083528, registration number 1504**

Type (types) of activity for performance of which the issuer obtained a licence or and access: **activities that involve usage of information constituting state secret**

Date of issue of licence or access to particular types of works **20.07.2015**

Expiry date of licence or access to particular types of works: **06.08.2018**

The Issuer's management takes all the actions required for timely obtainment, actualization and prolongation of licenses and minimization of the probability of the suspension, change or withdrawal. In this connection, the forecast of licenses prolongation probability is favourable.

At the same time, there is a risk related to changes in the legislation or with decisions of federal or regional bodies on licensing issues that is beyond the Issuer's control. Thus, the Issuer cannot guarantee that no future changes will take place that may have negative effect on one's activity. However, presently the Issuer's activity reveals no prerequisites of legal, economic or political character related to complication of the procedure or reduction of the licenses prolongation possibility.

3.2.6. Information on activity of particular categories of issuers

Issuer is not joint stock investment fund, insurance or credit company, or mortgage agency.

3.2.7. Additional requirements to issuers which main activity is the extraction of minerals

Mining is not the core activities of the issuer

3.2.8. Additional requirements to issuers which main activity is the provision of telecommunications services

Provision of telecommunications services is not the core activities of the issuer

3.3. Issuer's future activity plans

Issuer's plans related to arrangement of new production capacity: Arrangement of new production capacity is not planned.

Issuer's plans related to extension and reduction of production capacity.

Development of the electric power grid sector of the Company is carried out in accordance with the approved scheme of prospective development of electric power grids and requirements of the technical specification for organization of technological connection of consumers to the Company's electric power grids.

It is planned to conclude over 30 thousand contracts for technological connection to the electric power grids with total capacity = 660 MW in 2016, the amount of cash fees (payment for technological connection) is projected to be 1 636.5 million rubles (excluding VAT), but it was then reduced to 1 339.4 million rubles (without VAT). The main reason for reducing the planned volume of cash flow - changes in deadlines for performance of contracts for technological connection.

It is expected that in 2020, due to the growth of power consumption in the region and the connecting of new customers, the amount of electricity transmission services rendered by the Company amount to 18 917 084 thousand kWh. (108% compared to 2015).

Issuer's plans related to development of new types of products:

Development of new types of products is not planned.

Issuer's plans related to modernization and reconstruction of fixed assets:

During the few coming years, “Kubanenergo” PJSC has scheduled construction and reconstruction of overhead lines, substations and other energy facilities, primarily – those oriented at provision for uninterrupted electric power supply of the Krasnodar Territory seaside areas (along the Black Sea and Azov Sea coasts), Krasnodar as a social and cultural centre and implementation of project of national standing on Taman peninsula: “Construction of Kerch strait bridge”, “Construction of dry-cargo zone of Taman seaport”.

Plans of issuer’s investment activity:

Kubanenergo PJSC carried out its investment activity in accordance with the approved by the BoD Investment programme for 2016-2020. The Investment programme was also approved by the Ministry of Energy of the Russian Federation (order No.1033 dated 25.12.2015).

Sources of funding the investment programme 2016:

- depreciation – 2 056.17 million rubles; - VAT recovery – 167.80 million rubles, - other internal funds – 44.82 million rubles, - advances on technological connection – 850.15 million rubles; - credit funds– 1 525.42 million rubles.

Implementation of investment programme includes construction and reconstruction of 136.14 km of power lines and putting into operation the transformer capacity in amount of 172.80 MW.

Plans of the issuer related to possible changes in operating activities: the changing of operating activity is not planned.

Future prospects in terms of sources of future income:

Main elements of Company’s financial strategy:

- provision of qualitative, reliable and stable power supply;
- reduction of power equipment tear and wear;
- keeping of tariff sources of investment for the renewal and development of the network;
- improving the efficiency of operating costs;
- making of a reserve capacity of power grids in the volume advancing economic development for 3 years;
- introduction of innovative technologies that meet the highest international standards in the field of power distribution at all stages of the process;
- ensuring of the profitability of investments in the distribution grid complex at the level of profitability of companies with comparable market conditions in the Russian Federation

3.4. Issuer's participation in industrial, banking and financial groups, holdings, groups of companies and associations

Name of the group, holding, corporate group or association: “**Rosseti**” PJSC

Term of issuer’s participation: **since July 1, 2008**

Role (place) and functions of the issuer in organization:

Since July 1, 2008 the issuer was a dependent and then later affiliated company of “Rosseti” PJSC that received the portfolio of voting shares of the Company by the law of succession on dividing balance sheet in the results of reorganization of RAO “UES of Russia” JSC. Functions of the issuer in the Holding: formation of power sector of Russia in the sphere of distribution grid complex.

3.5. Subsidiary and dependent companies of the Issuer

The issuer does not have subsidiary and dependent companies of material significance

3.6. Composition, structure and value of the Issuer's fixed assets, information on plans for

acquisition, replacement and retirement of fixed assets as well as all facts of encumbrance on the Issuer's fixed assets

30.09.2016

Unit: thousand rub

Group of fixed assets	Acquisition cost (replacement cost)	Accumulated Depreciation
Fixed assets	100 493 584	50 913 974
Total	100 493 584	50 913 974

Information on depreciation calculation method for groups of fixed assets: Depreciation on fixed assets objects is charged in linear mode based on the terms of useful service of these objects

Reporting date: 30.09.2016

Results of last revaluation of fixed assets and leased assets, carried out during the last completed financial year, with the date of the revaluation, gross and net (net of depreciation) of the book value of fixed assets before revaluation and gross and net (net of amortization) of the replacement cost fixed assets to reflect current revaluation. The above information is provided for groups of fixed assets. The data are provided on methods of accrual of depreciation charges on groups of fixed assets.

Unit: thousand rub

Group of fixed assets	Total cost before revaluation	Net asset value (excluding amortization) before revaluation	Revaluation date	Full replacement cost after revaluation	Depreciated replacement cost (excluding amortization) after revaluation
Homogeneous groups of fixed assets (group 110, 420)	43 563 850	14 951 010	31.12.2015	47 548 686	16 175 206
Total	43 563 850	14 951 010		47 548 686	16 175 206

Method of revaluation of fixed assets (according to coefficient of federal executive body for statistics, market cost of fixed assets, supported by documents and experts' reviews. In case of presence of experts' review it is necessary to specify the method of evaluation):

Revaluation of fixed assets as of 31.12.2015 was carried out for the groups of fixed assets (code 110 "Industrial buildings", code 420 "Equipment for the conversion of electric power") by "ENPI Consult" JSC in accordance with the agreement No.2e392/15/407/30-933 dated 01.09.2015. The final results of the revaluation of homogeneous groups of fixed assets (code 110 "Industrial buildings", code 420 "Equipment for the conversion of electric power") not reflected in the financial statements for 2015 in accordance with legislation.

Contractor:

"NP Consult" Joint Stock Company (abbreviated name – "NP Consult" JSC)

Address: office 500, 65 Starokaluzhskoe highway, 117630, Moscow

Mailing address: office 500, 65 Starokaluzhskoe highway, 17630, Moscow

BIN 1027700283566 dated 07.10.2002,

Civil liability is insured by the Contractor:

“GSK “YUGORIA” JSC insured for the amount of 50 000 000 (fifty million) (insurance policy from 12 September 2013 to the supplementary agreement No. 3 from 12.09.2013 to the contract of compulsory insurance of appraiser's responsibility when exercising appraisal activity No. 59-000187-09/11 dated 05.08.2011, the insurance term: 9 March 2012 – 31 December 2017).

“Alpha Insurance” JSC: appraisers liability insurance contract No. 0991R/776/10004/5 dated 12.02.2015, on the basis of which was issued the certificate No.0991R/776/10004/5 on 18February 2015 with the term of the certificate: 9 March 2015 – 8 March 2016. The total insured sum is 500 000 000 (five hundred million) rubles. Franchise: 50 000 000 (fifty million) rubles.

“NP Consult” JSC is fully consistent with the requirements of paragraph 15.1 of the Federal Law No. 135-FZ dated 29.07.1998 “On Valuation Activities in the Russian Federation”

For the analyzed objects the current (replacement) value equals to the sum of expenses for creation of) new similar fixed assets..

Information on plans for the acquisition, replacement, retirement of fixed assets, the value of which is 10 or more percent from the total assets value, and other fixed assets at the discretion of the issuer, as well as all facts of encumbrance of the issuer (indicating the type of burden, the date of encumbrance, its validity and other conditions at the issuer's discretion):

The approved investments programme 2016 does not include modernization of facilities, cost of modernization of which is more than 10% of issuer’s fixed assets

Property of "Kubanenergo" PJSC encumbered by leases as of 30.09.2016:

IV. Information on issuer's business activity

4.1. Results of business activity

Dynamics of indicators showing the issuer's business activity, including its profitability and loss

Standard (rules) applied for making the accounting report: RAS

Unit of measurement for the sum of uncovered loss: thousand rubles

Indicator	9 months of 2015	9 months of 2016
Net Profit, %	3.32	6.87
Asset turnover ratio, times	0.42	0.48
Profitability of assets, %	1.39	3.33
Profitability of internal capital, %	2.77	6.44

Sum of non-covered loss as of reporting date	14 022 392	12 432 683
Ratio of non-covered loss as of reporting date and balance currency	23.1	19.3

All indicators are calculated on the basis of the recommended methods of accounting

Economic analysis of the liquidity and solvency of the issuer, the issuer's capital adequacy for fulfillment of the short-term liabilities and to cover current operating expenses based on the economic analysis of the specified parameters describing the factors which, in the opinion of the issuer, had the most significant effect on the liquidity and solvency of the issuer:

Profitability and return on equity indicators by the results of 9 months of 2016 are positive due to the presence of net profit for the reporting period. Return on equity increased within 9 months of 2016 by 3.67 points and amounted to 6.44%. Significant impact on the increase in this indicator in the reporting period was the increase in the Company's net revenues in 1.5 times.

Opinions of the issuer's management bodies on the causes or their effects on the financial and economic activities are not the same: **None**

Member of the Board of Directors (Supervisory Board) of the Issuer, or a member of the collegial executive body that has a special opinion on the reasons and/or their impact on the financial performance of the issuer, as reflected in the minutes of the meeting (session) of the Board of Directors (Supervisory Board) of the Issuer or the collective executive body, which considered the relevant issues, and insists on such a view in the quarterly report: **None**

4.2. Liquidity of the Issuer, sufficiency of equity and current assets

Dynamics of indicators showing the issuer's liquidity

Standard (rules) applied for making the accounting report: RAS

Unit of measurement for the sum of net fixed assets index: thousand rubles

Indicator	9 months of 2015	9 months of 2016
Net fixed assets index	-8 644 219	-8 425 023
Current liquidity ratio	0.55	0.52
Quick liquidity ratio	0.47	0.45

By issuers decision the dynamics if indicators characterizing issuer's liquidity is additionally disclosed, the indicators are compiled on the basis of data of consolidated accounting report which is included in the quarterly report: **no**

All indicators are calculated on the basis of recommended methods of accounting: **yes**

Economic analysis of the liquidity and solvency of the issuer, the issuer's capital adequacy for fulfillment of the short-term liabilities and to cover current operating expenses based on the economic analysis of the specified parameters describing the factors which, in the opinion of the issuer, had the most significant effect on the liquidity and solvency of the issuer:

The indicator "Net working capital" has increased by the results of 9 months of 2016 in comparison to same indicator of 2015 and amounts – 8 425 023 thousand rubles. The optimum amount of net working capital (net working assets) is determined in accordance with the individual needs of each company and depends on the size and characteristics of its activities, the turnover period of inventories, receivables, and on the conditions of borrowings and loans, etc. The indicator improved due to a decrease in short-term liabilities of the Company as compared to the first 9 months of 2015.

The current liquidity ratio allows to determine how many times current assets cover short-term liabilities. The current ratio decreased in comparison to the same period of 2015 by 0.03 points and made up 0.52.

The quick ratio shows how much the most liquid assets cover current liabilities of the organization.

By the results of 9 months of 2016 the quick ratio has decreased by 0.02 points compared to 2015 and totaled 0.45.

The main reason for these changes is reduction in sum of monetary funds and money equivalents.

Opinions of the issuer's management bodies on the causes or their effects on the financial and economic activities are not the same: None

Member of the Board of Directors (Supervisory Board) of the Issuer, or a member of the collegial executive body that has a special opinion on the reasons and/or their impact on the financial performance of the issuer, as reflected in the minutes of the meeting (session) of the Board of Directors (Supervisory Board) of the Issuer or the collective executive body, which considered the relevant issues, and insists on such a view in the quarterly report: None

4.3. Financial investments of the Issuer

30.09.2016

The list of the Issuer's financial investments, representing 5 or more percent of all financial investments as of the end of the reporting period

Investments in the securities

Form of securities: **shares**

The Issuer's full business name: **Recreation Centre Plamya Joint-Stock Company**

The Issuer's abbreviated business name: **RC Plamya, JSC**

Issuer's location: **Novomikhailovsky-2 village, Tuapse district, Krasnodar Territory, 352856**

TIN: **2365000589**

PSRN: **1042330761274**

Date of state registration of the issue (issues)	Registration number	Registering Authority
21.12.2004	1-01-34134-E	Direction of the Russian Federal Securities Commission for the Southern Federal District
30.01.2012	1-02-34134-E	Direction of the Russian Federal Securities Commission for the Southern Federal District
06.11.2012	1-03-34134-E	Direction of the Russian Federal Securities Commission for the Southern Federal District

Number of securities owned by the Issuer: **19 288 083**

The total nominal value of securities owned by the Issuer: **102226.84 RUR x 1**

The total book value of securities owned by the Issuer: **17 234.2**

Unit of measurement: **thousand rubles**

The Issuer of securities is subsidiary and (or) affiliate Company in relation to the Issuer that drew up this quarterly report

By results of 9 months of 2016 no dividends were declared or paid.

The size of the fixed interest or other income on bonds and other promissory equity securities or the procedure for determining the payment deadline;

the amount of dividend on preferred shares or the procedure for determining when it is defined in the charter of the joint stock company - issuer, term of payment;

the size of declared dividend on ordinary shares (in the absence of data on the size of declared dividend on ordinary shares in the current year, the amount of dividends declared in the previous year), term of payment

Additional information:

On 09.02.2015 Arbitration Court of the Krasnodar region in its decision recognized Recreation Centre "Plamya" as insolvent (bankrupt), in respect of this company the bankruptcy proceedings were started. In accordance with the Federal Law "On Insolvency (Bankruptcy)" No.127-FZ dated 26.10.2002, from the date of the arbitration court's decision to declare the debtor as bankrupt and on opening bankruptcy proceedings the powers of the governing bodies of Recreation Centre "Plamya" are terminated.

Type of securities: **shares**

The full name of the Issuer: "**Recreation centre "Energetik", JSC**"

Abbreviated name of the Issuer: "**R/c "Energetik"**"

Address of the Issuer: **4, Pionerskaya street, village Divnomorskoye, Gelendzhik, Krasnodar region, 353490**

TIN: **2304041820**

PSRN: **1042301876495**

Date of state registration of the issue (issues)	Registration number	Registering Authority
21.12.2004	1-01-34134-E	Direction of the Russian Federal Securities Commission for the Southern Federal District

Number of securities owned by the Issuer: **39 845 257**

Total face value of the securities owned by the Issuer: **39845257 RUR x 1**

Total book value of the securities owned by the Issuer, RUR: **45 588.4**

Unit of measurement: **thousand rubles**

The Issuer of securities is subsidiary and (or) affiliate Company in relation to the Issuer that drew up this quarterly report

By results of 2015 and 6 months of 2016 no dividends were declared or paid.

The size of the fixed interest or other income on bonds and other promissory equity securities or the procedure for determining the payment deadline;

the amount of dividend on preferred shares or the procedure for determining when it is defined in the charter of the joint stock company - issuer, term of payment;

the size of declared dividend on ordinary shares (in the absence of data on the size of declared dividend on ordinary shares in the current year, the amount of dividends declared in the previous year), term of payment

Additional information:

In accordance with the decision of the Management Board of Kubanenergo PJSC, performing the functions of the Annual General Meeting of Shareholders of Recreation Centre "Energetik"

on 30.06.2016 (minutes of meeting No.13/2016), it was decided to reduce the authorized capital of Recreation Centre “Energetik” to 34 665 373.59 rubles; this company has started the procedure of reduction of the authorized capital. On 30.09.2016 Board of Directors of Recreation Centre “Energetik” approved the decision on issue of shares placed by conversion into shares of the same category (type) with lower par value. On 13.10.2016 Office for the Rostov region of Southern Main Branch of the Bank of Russia carried out the state registration of issue of the shares.

Investments in non-emission securities

The issuer made a reserve for possible losses from investments in securities

The quantity of provision for impairment of securities at the beginning and end of the last completed fiscal year before the expiry date of the last reporting quarter:

In accordance with the Russian Accounting Standard (RAS) “Accounting of investments” RAS19/02 approved by the Ministry of Finance of the Russian Federation on 10.12.2002 No. 126n (hereinafter - RAS 19/02), Regulation on the accounting policy of the Company, the provision for impairment financial investments as of December 31, 2015 and as September 30, 2016 amounted 17 336 thousand rubles

Other financial investments

There are no other financial investments that make up more than 5 percent of all investments.

Information about the magnitude of potential losses associated with the bankruptcy of organizations (enterprises), in which investments were made, for each type of investment: **no**

Information about losses is provided in the evaluation of the issuer's financial investments, as reflected in the issuer's financial statements for the period from the beginning of the year to the end of the last reporting quarter.

Standards (rules) of accounting reports, under which the issuer made the calculations reflected in this paragraph of quarterly report:

“Financial reports of the organization”, approved by order of Ministry of Finance of Russian Federation, RAS 19/02, “Accounting of investments”, approved by order of the Ministry of Finance of Russian Federation dated 10.12.2002 No. 126n.

Contributions to the charter capital of other organizations are recognized as financial investments of the organization and are accounted at sum of actual costs of investor, i.e. at the value of contributed assets on which they are recorded in the balance sheet of the investor.

Financial investments, on which the current market value is not determined, are to be reflected in the accounting records and financial statements at the balance sheet at initial cost (paragraph 21 of Regulation on Accounting 19/02).

Financial investments, which make possible to determine the current market value are recognized in the financial statements at the end of the year at the current market value by adjusting their estimates for the previous reporting date (paragraph 20 PBU 19/02).

Debt securities are accounted at the cost of purchase. The difference between the acquisition cost and the nominal value of the securities should be included in other income and expenses.

4.4. Intangible assets

30.09.2016

Unit: **thousand rubles.**

Intangible assets	Initial (replacement) cost	Depreciation

Intangible assets	44 088	25 786
TOTAL	44 088	25 786

Standards (rules) of accounting, under which the issuer provides information on its intangible assets:

Accounting of intangible assets in accordance with the Order of Ministry of Finance of Russian Federation dated 27.12.2007 No. 153n “About approval of accounting “Accounting of Intangible Assets” (RAS 14/2007).”

Reporting date: **30.09.2016**

4.5. Details of the Issuer’s policy and expenses in the field of scientific and technical development, with regard to licenses and patents, new researches and developments

Information on the Issuer's policy in the field of scientific and technical development for the reporting period including disclosure of costs in connection with scientific and technical activity carried out at the expense of the Issuer’s proprietary assets:

The Company’s policy in the field of scientific and technical development is aimed at increase of reliability of energy equipment operation, cost-effectiveness and environmental safety of the Company’s core energy facilities activity.

The Innovative Development Program of Kubanenergo PJSC was approved by the Board of Directors of Kubanenergo on 29.07.2011 (as amended on 15.06.2012).

The R&D plan is a part of the Programme of innovative development of the Company.

The R&D plan is formed for 5 years:

- the first year includes details, broken down by themes, to be performed in the planned year, including uncompleted innovative projects;
- the following years - the forecast with annual adjustments.

The Company's research and development plan for 2016 contains 5 projects, 2 of them have commenced in 2016.

In accordance with the Company’s investment programme the limit for R&D projects is 9.63 million rubles.

In the 1st quarter of 2016 the company paid the state duty for the maintenance of the patent of the Russian Federation for useful model for the third year in the amount of 850 rubles.

In the 2nd quarter the final third phase of development work was carried out and approved and payment of 2.2 million rubles on the project “Development of software for targeted recommendations and low-cost methods for reducing the technological losses in 6-10 kV networks of Kubanenergo JSC” was performed. Result of R&D: a software package RETP 6-10 kV.

In the 3rd quarter the first stages of research and development works commenced on two projects for the total amount of 3.6 million rubles, VAT excluded.

Information on the creation and acquisition by the Issuer of legal protection of intellectual property rights (including the date of issue and the duration of patents for invention, utility model or industrial design, the state registration of trademarks and service marks, appellations of origin):

On 14.07.2016 as a result of the R&D project the company obtained a certificate of state registration of the software programme “REPT 6-10kV” No.2016617748.

The main directions and results of use of main for the issuer intellectual property objects:

In the reporting period the Company adopted the balance of the following intangible assets:

It was offered to use the following results of R&D projects received earlier:

- UV system diagnostics of insulation at Substation and overhead lines 35-110 kV - detection system on electrical insulation of crown discharge and electric arc in daylight at Substation and overhead lines 35-110 kV, allows to define status of the equipment, to identify the malfunction of a component and the possibility of failure, exact location of the source of the crown and specify necessity of equipment repair. This reduces time of detecting the defecting part and elimination of such defect.

- Microprocessor adaptive fine protection of near and remote redundancy of transformers of tap-off and intermediate substations. The specified protection provides a high sensitivity to short circuits for transformers by detecting emergency operation against the background of a comparable level of current load, start-up (self-starting) of electric motors, the influence of transition resistance of the electric arc.

- System of monitoring insulation on power transformers by method partial discharge search. The system prevents accidents, speeds up search of insulation defects, reduces the maintenance work and monitors the quality of their performance.

Risk factors associated with the possible expiry of the basic patents, licenses for the use of trademarks:

There are no risks associated with the expiration of the patents and licenses for the use of trademarks in the Issuer.

4.6. Analysis of development trends in the sphere of Issuer's core activity

Implementation of investment programs elaborated by “Kubanenergo” JSC and providing for development, technical re-equipment and reconstruction of the electric power grid sector of the Company should provide reliable electric power supply to existing and future electric energy consumers in the next few years.

Positive factors and conditions affecting the Issuer’s activity include, in particular:

- Growth of energy consumption in the region
- Increase of payment discipline of energy selling companies
- Growth of capacities commissioned
- Power redistribution among consumers according to their needs (actual consumption).

Negative factors and conditions affecting the Issuer’s activity include, in particular:

- ageing of the Issuer's core equipment
- reduction of rate of uniform “boiler” tariffs for electricity transmission services
- inconsistency decisions taken in the sphere of establishment of electric energy transmission tariffs to the extent of the investment component inclusion
- necessity to provide meter reading because of the absence of automated system of remote control and accounting of electric energy
- increase in losses of active energy consumed for heating of wires due to the lack of compensation of reactive power.

General evaluation of the results of Issuer's activity in this particular sector; correspondence of the results of the Issuer’s activity to the trends in the sector development; reasons justifying the obtained results of the activity (satisfactory and unsatisfactory results, in the Issuer's opinion):

The main result of the Issuer's activity in power industry consists in provision of reliable and uninterrupted power supply of consumers, consistent implementation of investment projects on construction and reconstruction of overhead lines, substations and power industry facilities, primarily oriented at provision for uninterrupted power supply of the of the Krasnodar Territory

seaside areas (along the Black and Azov Seas coasts), especially Sochi district, Krasnodar as a social and cultural centre, as well as implementation of projects on Taman peninsula: “Construction of transport passage through the Kerch Strait”, “Project on construction of dry cargo district in Taman port”. Successful resolution of tasks set to the Company within the framework of the industry reform by efforts of “Kubanenergo” PJSC management contributes to it.

4.7. Analysis of factors and conditions affecting the Issuer's activity

The impact of inflation, changes in exchange rates, government decisions, economic, financial, political and other factors affecting the business activity of the issuer and which influenced the amount of revenue from sale of goods, products, services and income (loss) from core business.

Among the factors and conditions that directly influence the Issuer's activity is the economic stability of the region.

In the current macroeconomic conditions the core activity of the issuer is influenced by inflation, as well as increasing interest on loans by the creditor banks. In addition, the growth of productive supply and electricity transmission revenue due to the increase of energy consumption, including through the development of infrastructure of the Krasnodar region and the Republic of Adygea within 9 months of 2016.

Prices (tariffs) for Company’s services on energy transmission and grid connection are subject to tariff regulation, along with it, due to introduction of restriction to tariff growth, there is a risk that the Regional Energy Commission of the Krasnodar region approves tariffs that do not fully consider expenses of Kubanenergo PJSC.

Undeveloped networks in some districts of the Krasnodar region and the Republic of Adygea together with ever growing demand have led to overloading of power lines and transformers.

Reliability of power supply is reduced because of aged equipment, which means extra expenditures for keeping the equipment going.

In the part of power transmission services, the Issuer’s activity is influenced by:

- due to the fact that calculation of technological losses is performed based on regular network scheme, all changes in its parameters and configurations influence the amount of energy losses (in order to prevent accidents in networks it is necessary to redistribute the loads). Such forced redistribution of loads and changes in operating network scheme lead to increase of actual technological losses both at the expense of losses in power transformers and losses of electric energy that occur because of transfer of extra reactive power from inoperative power transformers and increased load;
- shortage of record-keeping equipment makes impossible to analyze in due time the load on networks.

Measures taken by the issuer to efficiently use these factors and conditions:

The Company pays great attention to development of power grid facilities using scientifically grounded technical solutions and technologies tested during the operation of, modern equipment. In order to meet consumers' demand for more capacity, a reliable and uninterrupted electricity supply, the Company invested considerable funds for the reconstruction of electrical networks and the creation of new connection points.

The Company continuously interacts with the Department in order to establish reasonable tariffs. In order to increase efficiency and improve the financial and economic condition of “Kubanenergo” PJSC and to ensure financial stability and achieve sustainable positive financial result of activity, “Kubanenergo” PJSC developed a plan to increase efficiency and improve the financial and economic condition of “Kubanenergo” PJSC.

The list of internal and external measures, taken to increase the efficiency of business processes in both “Kubanenergo” PJSC and the group of companies “Rossetti” PJSC in general, has been defined taking into account the prevailing macroeconomic conditions.

Methods used by the issuer and methods the issuer plans to use in the future to reduce the negative effect of factors and conditions influencing the issuer's activity:

Currently Kubanenergo PJSC implements the following programmes:

- investment programme,
- programme on improvement of the efficiency, reliability and safety of energy production,
- repair programmes.

Implementation of developed by Kubanenergo investment programmes that include the development, modernization and reconstruction of electric grid facilities of the Company. This should improve the state of power supply to consumers of electricity in the coming years.

In addition, the issuer shall apply the following methods:

- implementation of measures aimed to improve the payment discipline and reduce the accounts receivable for electricity transmission services, including the elaboration of mechanisms of consolidation of transmission assets;
- optimization of the investment costs;
- providing cost savings through effective use of material resources, increase productivity, optimization of the organizational structure of the company (without loss of qualified personnel);
- imposition of limitations on power consumption in case of debts in payments for the electricity from the customers;
- carrying out work on the consolidation of property owned by territorial grid companies that do not meet the criteria of referring the owners to territorial grid companies, approved by the order of the RF Government No.184 dated 28.02.2015 "On attribution of owners of grid facilities to territorial grid companies".

Significant events/factors that may have the most negative impact on the possibility gaining by the Issuer in the future the same or better results as compared to the results obtained for the last reporting period, as well as the likelihood of such events (factors):

Development of infrastructure of the region that is located in the Company's area of responsibility, construction of various objects is accompanied by an increase in electricity consumption. There is a situation in which may occur and increase the risks of ensuring reliability of electricity supply to consumers and stable operation of the power grid due to overloading of transmission lines and transformers in normal and post-emergency conditions, as well as the wear and tear of power equipment. Number of equipment, buildings and structures that are worn-out and subject to replacement, reconstruction or technical re-equipment is growing constantly. The probability of such events is estimated by the Company as average.

Negative factors and conditions affecting the Issuer's activities also include:

- absence of mutual agreement on the decisions made in the sphere of establishment of tariffs for electricity transmission in regard to the inclusion of the investment component;
- half automatized electricity metering systems, which reduces the accuracy of the reporting of account information from user;
- increase in the active power loss consumed for heating wires due to the lack of compensation of reactive power consumers.

Significant events/factors that may improve the performance of the issuer, and the probability of their occurrence and their duration:

- the growth of energy consumption in the regions of the Company's presence,
- implementation of the investment programme, which allows to increase operational efficiency,

- improving the payment discipline of retail companies and “direct” customers;
- redistribution of power between consumers according to their needs (actual consumption);
- development of energy service activities, automation of electricity metering in networks with problem areas helps to reduce losses;
- solution of public authorities in setting tariffs for electricity transmission and to ensure non-discriminatory access of consumers to power grids,
- decrease in interest charged by banks on credit contracts due to changes in financial market conditions,
- minimization of operating costs as part of the performance management programme of activities that allow the Company to achieve the target to reduce the cost of electrical equipment maintenance unit by 5.86 thousand rub rubles/c.u. (18.7%) by 2019 from the level of 2012, with the target of reducing the value by 15.0%, and achieve a reduction in operating expenses by at least 3% compared to the previous year, in 2016 no less than 10 % in relation to 2015, in accordance with the Order of the Government of the Russian Federation from 04.07.2016 No.4750П-III.

The letter dated 02.09.2015 No.КЭ/1200/431 that was sent to the Federal Antimonopoly Service and the Federal Tariff Service of Russia as an application for examination of the dispute with REC-DCT KK on the recognition of the costs of “Kubanenergo” PJSC for the purchase of electricity in order to compensate for the losses as economically justifiable and to be considered as part of the necessary gross proceeds of “Kubanenergo” PJSC. FAS Russia made a decision on 18.02.2016 No.СII/9795/16 to satisfy the requirements of “Kubanenergo” PJSC. Based on the FAS Russia's decision from 18.02.2016 “Kubanenergo” PJSC by order of REK-DCT KK from 29.06.2016 No.24/2016-e, starting from 01.07.2016 the uniform (boiler) tariffs for electricity transmission through the networks of the Krasnodar region and Republic of Adygea were revised.

By letter dated 17.03.2016 No.KE/1200/78 the Company sent to the Federal Antimonopoly Service a statement of consideration of the dispute with the Regional Energy Commission – Department of prices and tariffs of the Krasnodar region on the recognition of costs incurred by “Kubanenergo” PJSC on grid connection as economically justifiable and to be considered as part of the necessary gross “Kubanenergo” PJSC. On 30.05.2016 FAS Russia adopted a decision No. СII /36275/16 to satisfy the claims of “Kubanenergo” PJSC.

Implementation of the developed by Kubanenergo investment programmes that ensure the development, modernization and reconstruction of electric grid facilities of the Company, will provide reliable power supply of existing and prospective consumers of electricity in the coming years.

The likelihood of such factors is estimated by the Company as considerable. To anticipate the duration of these events is not possible due to the uncertainty of the economic situation development in Russia and in the whole world.

4.8. Issuer's Competitors

No changes occurred during the reporting period in the information disclosed in this chapter.

V. Details on persons that are members of the Issuer's management bodies, the Issuer's bodies in charge of control of financial and business activity and brief details on the Issuer's employees (workers)

5.1. Details of the structure and competence of the Management Bodies of the Issuer

Full description of the structure of the Issuer's Management Bodies and their competences in accordance with the Issuer's Charter (constituent documents):

In accordance with “Kubanenergo” PJSC Charter, the management bodies of the Company are:

- General Meeting of Shareholders;
- Board of Directors;
- Management Board (Collegial Executive Body of the Company);
- General Director (Sole Executive Body of the Company).

The General Meeting of Shareholders is the Supreme Management Body of the Company.

General management of the Company’s activity is carried out by the Board of Directors.

General Director and the Management Board of the Company carry out management of current activity of the Company.

Issues referred by the Company Charter to the competence of the General Meeting of Shareholders of the Issuer:

In accordance with the Company Charter, the following issues are referred to the competence of the General Meeting of Shareholders:

- 1) Introduction of changes and amendments to the Charter or approval of a new version of the Charter;
- 2) Reorganization of the Company;
- 3) Liquidation of the Company, appointment of liquidation commission and approval of intermediate and final liquidation balances;
- 4) Definition of number, nominal value, category (type) of declared shares and rights, vested in such shares;
- 5) Increase of charter capital of the Company through increase of nominal value of shares or placement of additional shares;
- 6) Reduction of charter capital of the Company through reduction of nominal value of shares, acquisition of a part of shares by the Company with the purpose of reducing of their total number and through redemption of shares acquired or bought out by the Company;
- 7) Splitting and consolidation of the Company shares;
- 8) Making decision on placement of the Company bonds convertible into shares and other issued securities convertible into shares;
- 9) Determination of the number of members of the Board of Directors of the Company, election of its members and early termination of their powers;
- 10) Election of members of the Auditing Commission of the Company and early termination of their powers;
- 11) Approval of external Auditor of the Company;
- 12) Approval of resolution on transfer of the power of the sole executive body of the Company to a management organization (manager) and on early termination of their powers;
- 13) Approval of annual reports, annual accounting statements, including profit and loss statements (profit and loss accounts) of the Company, and distribution of profit including payment (declaration) of dividends, except for the profit distributed in the form of dividends by the results of the first quarter, half-year, nine months of fiscal year, and losses of the Company by the results of fiscal year;
- 13.1) payment (declaration) of dividends by the results of the first quarter, half-year, nine months of fiscal year;

- 14) Determination of the proceedings of the General Meeting of the Company's Shareholders;
- 15) Making decision on approval of transactions in the cases stipulated by Article 83 of the Federal Law "On Joint Stock Companies";
- 16) Making decision on approval of major transactions in the cases stipulated by Article 79 of the Federal Law "On Joint Stock Companies";
- 17) Approval of resolution on participation in financial and industrial groups, associations and other unions of commercial organizations;
- 18) Approval of internal documents regulating the activity of the Company's bodies;
- 19) Making decision on payment of remuneration and (or) compensations to the members of Auditing Commission;
- 20) Making decision on payment of remuneration and (or) compensations to the members of the Board of Directors;
- 21) decisions on filing an application on delisting Company's shares or securities convertible to shares
- 22) Making decision on other matters, stipulated by the Federal Law "On Joint Stock Companies".

Issues referred by the Company Charter to the competence of the Board of Directors of the Issuer:

The following issues fall within the competence of the Board of Directors:

- 1) Determination of the priority domains of the Company activities;
- 2) Convening of the annual and extraordinary General Meetings of the Company Shareholders, with exception of the cases specified in Clause 14.8 of Article 14 hereof and declaration of the new General Meeting date to be held instead of a failed one due to absence of quorum;
- 3) Approval of the agenda of the General Meeting of the Company's Shareholders;
- 4) Election of the secretary of the General Meeting of the Company's Shareholders;
- 5) Determination of the date of record of the list of persons entitled to attend the General Meeting of the Company's Shareholders, fixing up the date of making the list of persons entitled to receive dividends, approving of costs estimated on holding general meeting and making decisions on other issues related to preparation and holding of the General Meeting of the Company's Shareholders;;
- 6) The decisions on issues specified in sub-items 2, 5, 7, 8, 12–20 of Clause 10.2 of Article 10 hereof, as well as reduction of charter capital of the Company, on fixing up the date of making the list of persons entitled to receive the dividends can be made by AGM only at the suggestion of the Board of Directors of the Company.
- 7) placement of additional shares, into which preferred shares placed by the Company of a certain type are converted, convertible into common shares or preferred shares of other types, if such a placement is not associated with an increase in the authorized capital of the Company, as well as placement of bonds or other equity securities other than shares; Eurobond issue and determining policy in the sphere of the issue of securities (except for shares) and Eurobonds;
- 8) Approval of resolution on issue (additional issue) of securities, securities issue prospect, and report on the results of the securities issue (additional issue), and notification on results of issue (additional issue) of securities, approval of reports on the results of acquisition of shares

from the Company shareholders, reports on share redemption results, reports on the claims of the Company shareholders for repurchase of shares held by them;

9) Determination of the property price (pecuniary valuation), price of placement or procedure of fixing the price and redemption of issued securities in the cases stipulated by the Federal Law “On Joint Stock Companies” and upon making decisions on the issues specified in Items 11, 21, 38 of Clause 15.1 hereof;

10) Acquisition of the shares, bonds and other securities placed by the Company in the cases stipulated by the Federal Law “On Joint Stock Companies”;

11) Alienation (realization) of the Company shares occurring at the Company’s disposal as a result of their acquisition or repurchase from the shareholders of the Company and in other cases stipulated by the Federal Law “On Joint Stock Companies”;

12) Election of General Director of the Company and early termination of his powers, including resolution on early termination of the employment contract within him;

Information on the availability of a separate structural unit(s) for the risk management and internal control (other than the Audit Commission (Auditor), body (structural unit) in charge of internal control of financial and economic activities of the issuer), its tasks and functions:

Before April, 2008, functions of the Issuer's internal control service were discharged by the Controlling and Internal Audit Service established in August, 2004.

From April, 2008 till November, 30, 2010, under Contract No. 407/30-1143/26 "On transfer of powers of Sole Executive Body" between the Issuer and OJSC "IDGC of South" dated 14.09.2007, discharge of functions aimed at provision for efficient functioning of the internal control system in the Issuer was carried out by the Department for Internal Control and Audit of OJSC "IDGC of South".

In accordance with Decision of the Board of Directors of the Issuer dated 05.08.2010 (Minutes No. 94.2010 dated 06.08.2010), a Directorate for Internal Audit and Risk Management was established within the Issuer's organizational structure.

In accordance with the resolution of the Issuer's Board of Directors (Minutes of meeting No.195/2014 dd. 29.08.2014) the Directorate of Internal Audit and Risk Management was transformed into the Internal Audit and Control Department.

The Audit Committee (Minutes of meeting No.25/2015 dd. 27.02.2015) agreed to establish a Directorate for Internal Control and Risks Management as part of the Internal Audit and Control Department.

In accordance with the decision of the Issuer's Board of Directors dated 31.05.2016 (Minutes of meeting No.241/2016 dd. 31.05.2016), starting from 1 August 2016, the Department of Internal Audit and Control is divided into Internal Audit Department and the Directorate of Internal Control and Risk Management.

The main objectives of the Directorate of Internal Control and Risk Management include:

- 1) organization of development and improvement of the internal control system (ICS) of the Company, and provision of methodological support of internal control system;
- 2) organization of development and improvement of the risk management system (RMS) of the Company, providing methodological support and provision of RMS;
- 3) organization of monitoring activities of the Company;
- 4) organization of interaction with the external auditor concerning the issues of functioning of ICS and RMS;
- 5) interaction with state regulatory authorities on internal control

The main functions of the Directorate of Internal Control and Risk Management are:

- 1) development and provision of implementation and adaptation of key methodological documents on the construction and improvement of the ICS and RMS;
- 2) assistance to the Company's management in creation of the control environment, development of recommendations for the description and introduction to processes (activities) the control procedures and assignment of responsibility for officials, counseling on internal control;
- 3) coordination of activities for maintenance and monitoring of progress towards the target state of ICS and RMS;
- 4) overall coordination of risk management processes, including organization of interaction of all participants of the RMS;
- 6) formation of the annual consolidated report on organization, functioning and effectiveness of the risk management system of the Company, as well as other matters stipulated by the Risk Management Policy.
- 7) monitoring of implementation of activities and internal control procedures in the Company;
- 8) provision of information on the state of ICS and RMS in the Company;
- 9) organization to ensure compliance with the requirements of state supervisory bodies to the ICS;
- 10) ensuring interaction with state regulatory authorities in the exercise of control measures in respect of the Company and its subsidiaries;
- 11) coordination of activities of the Company and its subsidiaries to develop corrective actions to

address deficiencies and implement recommendations and prescriptions.

Information on the Issuer's separate structural unit of internal audit, its tasks and functions:

Before April, 2008, functions of the Issuer's internal control service were discharged by the Controlling and Internal Audit Service established in August, 2004.

From April, 2008 till November, 30, 2010, under Contract No. 407/30-1143/26 “On transfer of powers of Sole Executive Body” between the Issuer and OJSC “IDGC of South” dated 14.09.2007, discharge of functions aimed at provision for efficient functioning of the internal control system in the Issuer was carried out by the Department for Internal Control and Audit of OJSC “IDGC of South”.

In accordance with Decision of the Board of Directors of the Issuer dated 05.08.2010 (Minutes No. 94.2010 dated 06.08.2010), an Administration for Internal Audit and Risk Management was established within the Issuer's organizational structure.

In accordance with the decision of the Issuer's Board of Directors (Minutes of meeting No.195/2014 dd. 29.08.2014) the Directorate of Internal Audit and Risk Management was transformed into the Internal Audit and Control Department.

In accordance with the decision of the Issuer's Board of Directors dated 31.05.2016 (Minutes of meeting No.241/2016 dd. 31.05.2016) starting from 1 August 2016, the Department of Internal Audit and Control is divided into Internal Audit Department and the Directorate of Internal Control and Risk Management.

The Internal Audit Department is functionally subordinated to the Board of Directors (the Board of Directors, through the Audit Committee), and administratively – to the General Director of the Company.

The main objectives of the Internal Audit Department are:

- 1) implementation and application of common approaches to establishment, management and coordination of the internal audit function in the Company;
- 2) carrying out the internal audit, participation in other inspection activities of the Company and its subsidiaries;
- 3) provision of independent and objective assurance regarding the effectiveness of ICS, RMS and corporate governance, and assistance to the executive bodies and employees of the Company in development and monitoring of implementation of procedures and measures for improvement of ICS, RMS and corporate governance;
- 4) organization of effective interaction with the Company's external auditor, the Audit Committee of the Company, with other stakeholders on issues related to the competence of the internal audit;
- 5) preparation and submission of reports on the results of the internal audit activity (including information about significant risks, deficiencies, results and effectiveness of the implementation of measures to address identified deficiencies, the results of the implementation plan of the internal activities audit, the results of the actual condition assessment, reliability and efficiency of ICS, RMS and corporate governance) to the Board of Directors, the Audit Committee of the Board of Directors and executive bodies of the Company.

The main functions of the Internal Audit Department are:

- 1) introduction of unified principles of establishment of the internal audit function, management and evaluation of the implementation of the internal audit function approved by Rossetti PJSC;
- 2) updating regulations governing the internal audit activities (policies, regulations, rules, procedures, instructions and other documents);
- 3) planning, organizing and conducting internal audits of business processes (activities), business functions, projects/plans/programmes, structural and separate subdivisions of the Company
- 4) carrying out thematic audits on a particular topic in accordance with the unified audit programme approved by the Rossetti PJSC;
- 5) organization of activities of the Audit Commission of affiliates;

- 6) participation of the Department of Internal Audit employees as elected members of audit commissions or invited experts in the activities of the Audit Commission of an affiliate;
- 7) participation in special (official) investigation into abuse (fraud), causing damage to the Company and its subsidiaries, misuse, inefficient use of resources, and other acts of unfair/illegal actions of employees and third parties;
- 8) inform the Board of Directors (Audit Committee), the executive bodies of the Company on the results of inspections, submission of recommendations to eliminate violations and deficiencies identified during the audit, and proposals to improve the efficiency and effectiveness of the ICS, RMS and corporate governance, on improving the Company's activities and its subsidiaries and affiliates;
- 9) monitor the implementation of corrective action plans to address violations and deficiencies identified in the audits and implementation of recommendations and proposals for improving the operations of the Company;
- 10) evaluation of the effectiveness of ICS, RMS and corporate governance;
- 11) advising the executive bodies of the Company on the CRS, RMS and corporate governance (while maintaining the independence and objectivity of the internal audit).
- 12) assessment of quality of work of the external auditor, preparing reports on the results of this assessment, performance evaluation for consideration by the Audit Committee of the Board of Directors, to ensure awareness of interested parties;
- 13) interaction with the Audit Committee of the Company.

Policies of the issuer in the field of risk management and internal control are described in item 2.4 of the issuer's quarterly report

Information on the issuer's internal document establishing the rules to prevent misuse of confidential and insider information:

The Issuer approved an internal document that sets the rules for preventing use of confidential (insider) information.

In accordance with the requirements of the law No.224-FZ of 27.07.2010 "On Prevention of Unlawful Use of Insider Information and Market Manipulation and on Amendments to Certain Legislative Acts of the Russian Federation", the Issuer:

- developed and approved at the Board of Directors on 02.08.2013 (Minutes №of meeting No.168/2013) the Regulations on the insider information of the Company;
- formed a list of insider information;
- defined the persons related to insiders;
- sends notifications of inclusion/exclusion of persons in the list of insiders;
- maintains the list of insiders and sends to the organizers of trade an analysis of transactions in the securities market;
- ensures protection of the confidentiality of insider information and compliance with the rules of treatment of insider information by defining the rights of access to insider information, network folders inspection units, checks the state of network security, protection from leaks of confidential information;
- organized control over the Company's compliance with the legal requirements and regulations, legal acts of the Russian Federation on insider information.

Information on the activity of Kubanenergo PJSC in the field of combating unauthorized use of insider information and market manipulation is available on the Company's web site at: <http://kubanenergo.ru/aktsioneram-i-investoram/informatsiya-dlya-insayderov-obschestva/>

The Issuer plans to continue to develop activities aimed at organization and development of control mechanisms on use of insider information.

Data on the issuer's internal document establishing rules aimed at preventing the misuse of confidential and insider information:

In 2013, the Company adopted a single strategy document – Anti-corruption policy of Rossetti PJSC and affiliated companies of Rossetti (approved by the Board of Directors (Minutes of meeting No.201 dated 30.12.2014) (hereinafter –the anti-corruption policy), which defined a common approach to the implementation of requirements of article 13.3 of the Federal Law No. 273-FZ of 25.12.2008 “On combating corruption” (hereinafter – the Law on counteraction to corruption), relating to the Issuer's obligations to develop and adopt measures to prevent and fight against corruption: identification and subsequent elimination of the causes of corruption (prevention of corruption); detection, prevention and suppression of corruption and other offenses; minimization and (or) liquidation of the consequences of corruption and other offenses, including those described in the article 19.28 of Administrative Code “the responsibility for the illegal remuneration on behalf of the legal entity”

Anti-corruption policy is a fundamental document of Rossetti PJSC and its affiliated companies in the field of anti-corruption and contains: a set of interrelated principles and procedures for activities under the act of the official interpretation – Methodical recommendations of the Ministry of Labour, approved on 08.11.2013.

Main directions of anticorruption policy:

- assignment of departments responsible for prevention of corruption offenses and the fight against corruption
- assessment of corruption risks
- identifying and resolving conflicts of interest
- development and introduction of standards and procedures designed to ensure fair work
- review and approval of information on possible cases of corruption
- consulting and training of employees
- internal control and audit
- the adoption of measures to combat and prevention of corruption in cooperation with organizations of contractors
- interaction with public authorities exercising control and supervisory functions
- cooperation with law enforcement authorities in fighting corruption
- participation in collective initiatives for combating and preventing corruption.

The Issuer developed and approved a list of anti-corruption measures for Kubanenergo, providing for the implementation of activities and procedures and the procedure for their implementation.

All of this imposes a special obligation on the Issuer at forming a single vertically-integrated system of implementation of anti-corruption policies within the Group Rossetti, which controlling shareholder is the state.

In this connection, the Issuer is not only self-implementing measures to prevent and fight against corruption, but also takes part in the collective anti-corruption initiatives:

- On September 24, 2015 Kubanenergo PJSC acceded to the Anti-Corruption Charter of Russian Business (certificate No.2319 dd 24.09.2015);
- It uses standard contractual anti-corruption clauses.

Much attention Kubanenergo PJSC pays to the formation of transparent business standards. The automated system – “Analysis and collection of information on the beneficiaries” was created. The system allows collecting data from multiple sources into a single information space, providing test data on legal entities and individuals, identifying signs of affiliation, conflict of interest, pre-conflict situations, and other abuses.

The structural unit of the Company responsible for the prevention and fight against corruption performs the following functions:

- Carries out activities aimed at the implementation of the principles and requirements of the Anti-Corruption Policy;

- Develops anti-corruption programs for the implementation of anti-corruption policy directions;
- Carries out monitoring of activities aimed at identifying corruption and other offenses;
- Discusses reports of possible facts of committing corruption and other offenses by employees, contractors of Rosseti PJSC and its affiliated companies or other persons/entities;
- Organizes the completion and review of declarations of conflict of interest;
- Organizes training activities for the prevention and combating of corruption and individual consultation of employees;
- Evaluates the results of anti-corruption work and reporting materials management organization;
- Carries out activities to prevent and counter corruption and other offenses, conflicts of interest;
- Develops anti-corruption standards and provides technical assistance in the implementation of measures for combating and preventing corruption and legal education of employees;
- Coordinates the activities of the structural units in the sphere of implementation of anti-corruption policy;
- Organizes and monitors the Russian, applicable foreign and international anti-corruption legislation and track changes to them as well as the relevant jurisprudence;
- Prepares documents in the sphere of combating and prevention of corruption and initiates the updating of documents in connection with changes in the anti-corruption laws of the Russian Federation.

The Issuer, in particular, approved procedure for receiving, considering and resolving the applicant's requests (employees, contractors Kubanenergo PJSC and other natural and legal persons) of the possible cases of corruption, the Regulations for the Commission of Kubanenergo for Compliance of corporate ethics and conflicts of interest, the Regulation for the settlement of the conflicts of interest in Kubanenergo PJSC.

The Issuer updated the Commission on compliance with the rules of conduct and conflict of interest in Kubanenergo PJSC, organized work on the prevention of corruption, provided legal education and formation of the foundations of law-abiding behavior among employees of the electric grid complex and many other anti-corruption procedures, introduced an interactive channel of communication with applicants through the corporate web -site, the “hotline” for reporting on corruption.

Information about the activity of Kubanenergo PJSC in the field of preventing and combating corruption is available on the Company's web site at: <http://kubanenergo.ru/o-kompanii/antikorrupsionnaya-politika/>

Other information on announced and (or) paid dividends, specified by the Issuer in its sole discretion	no

According to the Regulations for the Company's Information Policy, information on dividends

declared and paid shall be specified for the last 10 completed fiscal years.

Additional information disclosed in accordance with the Regulations for Information Policy:

Dividend policy is a system of relations and principles for determining the amount of dividends, the procedure and terms of their payment, as well as the establishment of the Company's liability for failure to fulfill obligations on payment of dividends.

The dividend policy is based on balancing the interests of the Issuer and its shareholders when determining the amount of dividend payments in respect for and strict observance of shareholders' rights stipulated by current legislation of the Russian Federation, the Charter and internal documents of the issuer, and is aimed at improving the investment attractiveness of the Issuer, its capitalization and shareholder value.

The Company strives, along with the growth of capitalization, to increase the amount of dividends paid to shareholders, based on the amount of net profit for the financial period and the needs of production and investment activities of the Company.

In order to ensure the transparency of the mechanism for determining the amount of dividends and their payment, as well as informing the shareholders and other interested parties about the Company's dividend policy, on December 3, 2006 Kubanenergo Board of Directors approved the Regulations for the Dividend Policy (Minutes of meeting No.25/2006). On August 31, 2010 the Board of Directors of Kubanenergo approved this Regulation in the new edition (Minutes of meeting No.95/2010), which further contains provisions that improve the procedure for disclosure of information to shareholders and other stakeholders on the calculation and payment of dividends and the procedure for determining the amount of dividends.

8.7.2. Information on accrued and paid income on Bonds

Information shall be specified for each issue of bonds, under which for the five last complete reporting years, and if the issuer has been active for less than five years, for each complete reporting year, plus for a period from the date of the current year beginning till the date of the reporting quarter ending, income was paid.

Type of security: **listed/commercial bonds**

Form of security: **documentary to bearer**

Series: **001P-02**

non-convertible bonds with the compulsory centralized storage

State registration number of the issue: **4B02-01-00063-A-001P**

Date of assignment of identification number: **10.11.2015**

Agency that assigned identification number to the issue: **Closed Joint-Stock Company MICEX**

Number of bonds in the issue, pcs: **3 400 000**

Par value of each bond of the issue, rubles: **1 000**

Volume of the issue at the par value: **3 400 000 000**

Key information on income from bonds in the issue:

Certificated interest-bearing non-convertible bonds in bearer form of series 001P-02 with the compulsory centralized storage
